World Development Report, 1983 ,1983 This report reviews trends in the international economy and their implications for the developing countries with a special focus on the management and institutional aspects of development The early recovery in the world economy foreseen in last year s World Development Report did not materialize The recession has lasted longer than expected and has set back global development more decisively than at any time since the Great Depression The indications of an upturn are now firmer but the international financial system remains severely strained and protectionism continues to be an ominous threat This report reviews how alternative policies may affect the future prospects for recovery It concludes that the present financial crisis is manageable provided concerted efforts are made both nationally and internationally It is essential for the industrial countries to maintain the momentum of their recovery to promote freer trade and to ensure growth in capital flows Equally important developing countries must for their part continue their efforts to adjust their economies to the new external circumstances and thereby regain the confidence of their creditors The Politics of Global Competitiveness Paul Cammack,2022 Marx predicted in Capital 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition

between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

The China Miracle Justin Yifu Lin, Fang Cai, Zhou Li, 2004-03-15 The tremendous success of China's economic reform in contrast with the vast difficulties encountered by the former Soviet Union and Eastern European countries in their transition has attracted worldwide attention Using a historical comparative and analytic approach grounded in mainstream economics the authors develop a consistent and rational framework of state owned enterprises and individual agents to analyze the internal logic of the traditional planning system They also explain why the Chinese economy grew slowly before the market oriented reform in 1979 but became one of the fastest growing economies afterwards and why the vigour chaos cycle became part of China's reform process The book also addresses to the questions that whether China can continue its trend of reform and development and become the largest economy in the world in the early 21st century and what the general implications of China's experience of development and reform are for other developing and transition economies The first edition has been well received and is the standard textbook or reference for students and researchers of China studies In this thoroughly revised edition the authors have updated the data and information in the book and include a new chapter on the impact of China's WTO accession on its economic reforms and causes of the current deflation

World Development Report World Bank, 1985 **In Good Times Prepare for Crisis** Ira Lieberman, 2018-10-09 Sovereign debt crises are a little like the weather One can get ready to endure them and maybe take some steps to lessen their impact but so far it hasn't been possible to prevent them Like the weather they just keep happening That's the overriding thesis of this book tracing the major debt crises of the past century starting with the Great Depression and running through the recent Great Recession Written by a former World Bank expert on debt crises this book discusses best practices for how such crises can be resolved As the painful experience of the past decade reminded everyone frequent debt crises and defaults do great damage to economies and cause vast personal hardship But resolving them has proven difficult both economically and politically and has taken time almost always requiring a lender of last resort such as a country's central bank or the International Monetary Fund Too often efforts to end debt crises have been little more than a palliative and the debt overhang from one crisis contributes to the next as illustrated by the ongoing saga in Greece Both private and sovereign debts have increased substantially since the 2008 crisis with inadequate deleveraging This debt overhang leaves countries vulnerable and with limited maneuverability to address the next crisis This book does not pretend to describe how debt crises can be prevented But it does draw useful lessons from recent crises that can help economists bankers policymakers and others resolve the inevitable future crises with the least possible damage Bioenergy And
