Teacher Motivation Paul W. Richardson, Stuart A. Karabenick, Helen M.G. Watt, 2014-05-30 *Teacher Motivation Theory and Practice* provides a much needed introduction to the current status and future directions of theory and research on teacher motivation Although there is a robust literature covering the theory and research on student motivation until recently there has been comparatively little attention paid to teachers This volume draws together a decade of work from psychological theorists and researchers interested in what motivates people to choose teaching as a career what motivates them as they work with students in classrooms the impact of intrinsic and extrinsic forces on career experiences and how their motivational profiles vary at different stages of their career With chapters from leading experts on the topic this volume provides a critical resource not only for educational psychologists but also for those working in related fields such as educational leadership teacher development policy makers and school psychology [What Every Teacher Should Know About Student Motivation](#) Donna Walker Tileston, 2010-03-30 *Powerful brain friendly strategies for motivating challenging and celebrating your students* This second edition is filled with practices for motivating even the most at risk and reluctant students Informed by current research on the plasticity of the brain and new insights on the relationship between culture and student motivation the book features an extended classroom example of motivational techniques in action and vocabulary pre and post tests for teachers and details how Technology influences the brain and motivation Intrinsic and extrinsic motivation are related to celebrations and rewards Specific strategies can motivate students to begin and finish a task Teachers can foster students positive self talk and on task behaviors **Global Perspectives on Teacher Motivation** Helen M. G. Watt, Paul W. Richardson, Kari Smith, 2017-09-08 Many studies of teacher motivation have been conducted in different contexts over time However until fairly recently there has not been a reliable measure available to allow comparisons across samples and settings This has resulted in an abundance of findings which cannot be directly compared or synthesised The FIT Choice instrument offers the opportunity to examine motivations across settings The various studies in this book suggest that people who choose teaching as a career are motivated by a complex interaction of factors embedded within communities and cultural expectations but seem generally to embrace a desire to undertake meaningful work that makes for a better society Unlike some careers where rewards are in the form of salary and status by and large these factors are not strong drivers for people who want to become teachers They want to work with children and adolescents and believe they have the ability to teach *Teaching Tips* Spence Rogers, 1999 Practical immediately usable and teacher tested tips from leaders in effective instructional practices for increasing student motivation and learning [Highlights in Educational Psychology: Teacher-student Relationship](#) Claudio Longobardi, Alberto Crescentini, Elisabetta Sagone, 2024-12-16 We are pleased to introduce the collection *Frontiers in Psychology Highlights in Educational Psychology Teacher student Relationship* This collection will welcome and showcase a selection of articles about this timely topic authored by leaders in the field The work
