**Teaching and Learning Culture** Mads Jakob Kirkebæk, Xiang-Yun Du, Annie Aarup Jensen, 2013-11-19 This book is based on educational research conducted by researchers from the Department of Learning and Philosophy and the Confucius Institute for Innovation and Learning at Aalborg University Empirically it reports on different approaches to teaching and learning of culture including a student centered task based problem based learning PBL approach a digital technology supported approach and more It also reports on how when teaching and learning culture teachers professional identity and the informal teaching and learning environment impact the teaching and learning of culture in different educational settings from primary school to university A central theme in the book is the power of context The studies illustrate in multiple ways and from different angles that culture is not taught in a vacuum or learned in isolation but may be influenced by many factors both inside and outside the classroom at the same time culture also influences the context of the learning The context may be invisible and hide itself as tacit knowledge or embedded values or it may be very visible and present itself as a fixed curriculum or an established tradition No matter what forms and shapes the context takes the studies in this book strongly indicate that it is essential to be aware of the power of context in teaching and learning culture in order to understand it and negotiate it This book suggests that teachers should not try to limit or avoid contextual influences but instead should explore how the context may be integrated into and used constructively in the teaching and learning of culture This allowance of context in the classroom will allow for teachers students subjects and contexts to enter into a dialogue and negotiation of meaning that will enrich each other and achieve the established goal acquisition of cultural awareness and intercultural understanding
