*Turning the Tune* Adam R. Kaul, 2009 The last century has seen radical social changes in Ireland which have impacted all aspects of local life but none more so than traditional Irish music an increasingly important identity marker both in Ireland and abroad The author focuses on a small village in County Clare which became a kind of pilgrimage site for those interested in experiencing traditional music He begins by tracing its historical development from the days prior to the influx of visitors through a period called the Revival in which traditional Irish music was revitalized and transformed to the modern period which is dominated by tourism A large number of incomers locally known as blow ins have moved to the area and the traditional Irish music is now largely performed and passed on by them This fine grained ethnographic study explores the commercialization of music and culture the touristic consolidation and consumption of place and offers a critique of the trope of authenticity all in a setting of dramatic social change in which the movement of people is constant
