Sojourning in Disciplinary Cultures Maureen Mathison, 2019-04-15 *Sojourning in Disciplinary*

Cultures describes a multiyear project to develop a writing curriculum within the College of Engineering that satisfied the cultural needs of both compositionists and engineers at a large R1 university. Employing intercultural communication theory and an approach to interdisciplinary collaboration that involved all parties, cross-disciplinary colleagues were able to develop useful descriptions of the process of integrating writing with engineering, overcoming conflicts and misunderstandings about the nature of writing, gender bias, hard science versus soft science tensions, and many other challenges. This volume represents the collective experiences and insights of writing consultants involved in the large-scale curriculum reform of the entire College of Engineering; they collaborated closely with faculty members of the various departments and taught writing to engineering students in engineering classrooms. Collaborators developed syllabi that incorporated writing into their courses in meaningful ways, designed lessons to teach various aspects of writing, created assignments that integrated engineering and writing theory and concepts, and worked one-on-one with students to provide revision feedback. Though interactions were sometimes tense, the two groups, writing and engineering, developed a third culture that generally placed students at the center of learning. *Sojourning in Disciplinary Cultures* provides a guide to successful collaborations with STEM faculty that will be of interest to WPAs, instructors, and a range of both composition scholars and practitioners seeking to understand more about the role of writing and communication in STEM disciplines.

Designing interesting problems and writing assignments is one of the chief tasks of all teachers, but it can be especially challenging to translate and apply learning theory, good teaching techniques, and writing assignments into STEM and other quantitative disciplines. *Student Writing in the Quantitative Disciplines* offers instructors in math-based disciplines meaningful approaches to making their coursework richer and more relevant for their students, as well as satisfying institutional imperatives for writing curricula. This important resource provides instructors with the hands-on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students' general cognitive and intellectual growth. Comprehensive in scope, the book includes ideas for using writing as a means of learning mathematical concepts, illustrative examples of effective writing activities and assignments in a number of different genres, assessment criteria, and effective strategies for responding to students' writing. Examples of ways to help students engage in peer review, revision, and resubmission of their written work. Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one.

Chris M. Anson, University Distinguished Professor and director, Campus Writing and Speaking Program, North Carolina State University. Written by a mathematician, this readable, theoretically sound book describes practical strategies for teachers in the quantitative sciences to assign and respond to students' writing. It also describes numerous approaches to writing that engage students in disciplinary learning.

The Angry Young Men Humphrey Carpenter,2002 There may be more important literary movements than the Angry Young Men but there can be few as consciously or unconsciously entertaining The Angry Young Men were an absurdly diverse group often wildly at odds and indeed often wholly unacquainted with each other This cavalcade of

misunderstandings wild statements mediocrity and genuine achievement can now be seen as the first and most perfect example of how the media both helps and ruins literature Humphrey Carpenter s extremely funny new book celebrates the strange group of varying talents who at different times were believed to be Angry Young Men
