What Philosophy Is:

What Philosophy is Anthony O'Hear, 1985 **What Philosophy Is** Havi Carel, David Gamez, 2004-05-10 This book addresses the question What is Philosophy by gathering together responses from philosophers working in a variety of areas The resulting collection provides focused discussions of the character and methods of philosophy and its relationship with other disciplines What Philosophy Is Carel, David Gamez, 2007-01-01 **What Philosophy is** Arthur C. Danto, 1971

The Essentials of Philosophy Roy Wood Sellars, 2014-01 An excerpt from the beginning of the CHAP I WHAT PHILOSOPHY IS A Preliminary Definition Speaking in general terms we may say that philosophy is a persistent attempt to understand the world in which we live and of which we are a part This preliminary definition stresses the broadness of aim characteristic of philosophy It is an effort of the intellect of man to answer fundamental problems and gain a comprehensive view of the universe The conception of the exact nature of philosophy has varied from period to period as man's view of the world and of his place in it has changed Hence the history of philosophy has usually been the best index of those gradual alterations in the dominant interpretation of man and reality in which science and religion find their focus Plato believed that a supersensible realm of ideas existed apart from the world of perceptual appearance and his philosophy was at once a cause and an effect of this outlook It explained what reality was and how the human mind obtained valid glimpses of it During the Middle Ages man was prone to consider earthly things the creation of a supernatural deity and his philosophy was simply the earnest search for a systematic and consistent answer to such riddles as forced themselves upon his attention In the eighteenth century men were convinced that there was an external physical world and that their knowledge of it was contingent upon the sensations produced in their minds by the stimulation of their sense organs Certain general problems immediately resulted and philosophy was the persistent reflection upon these general problems Thus philosophy has always been rejection upon basic problems such as the nature of reality the distinction between the apparent and the real the conditions of human knowledge It has always been the conviction of the philosopher that these questions are unavoidable and that they can be solved only by intensive reflection A definite part of our task in the present introduction will be to explain the specific nature and inevitableness of these problems with which the philosophers of all ages have busied themselves Only in proportion as a concrete understanding of philosophical problems grows upon the student will he really understand what the veritable function of philosophy is The Attitude of the Philosopher The attitude and ideals of the philosopher are essentially the same as those of the scientist Both have the same mental curiosity and keen desire for valid knowledge the same willingness to bend theories into line with experience the same faith in methodical analysis and persistent investigation and reflection Were we defining philosophy by reference to the trained mental attitude and intellectual habits demanded we should identify it with science In this sense it is a science Probably the philosopher ought to emphasize this aspect of his subject in this day in which so many people know something of the spirit of science The

philosopher at his best is inspired with the same disinterested zeal to solve intellectual problems as is the specialist in some branch of theoretical science In this age of early instruction in the special sciences the student who finally comes to philosophy with mixed feelings of hope and doubt has already some acquaintance with the lives of such men as Newton Galileo and Darwin He knows and admires in them their whole hearted endeavors to solve problems in the domain of nature It is this spirit as much as what they have accomplished in the solution of specific problems which attracts the generous minded We can therefore best convey to the beginner a true idea of the philosopher by saying that he has the outlook of the scientist Both concern themselves with knowledge and both seek it openly and in disregard of consequences The philosopher is not a mystic nor the champion of some esoteric cult he is a scientist

Metaphilosophy and Free Will Richard Double,1996-09-26 Why is debate over the free will problem so intractable In this broad and stimulating look at the philosophical enterprise Richard Double uses the free will controversy to build on the subjectivist conclusion he developed in *The Non Reality of Free Will* OUP 1991 Double argues that various views about free will e g compatibilism incompatibilism and even subjectivism are compelling if and only if we adopt supporting metaphilosophical views Because metaphilosophical considerations are not provable we cannot show any free will theory to be most reasonable *Metaphilosophy and Free Will* deconstructs the free will problem and by example challenges philosophers in other areas to show how their philosophical argumentation can succeed

[The Philosopher](#) Justin Smith-Ruiu,2016-05-03 How the role of the philosopher has changed over time and across cultures and what it reveals about philosophy today What would the global history of philosophy look like if it were told not as a story of ideas but as a series of job descriptions ones that might have been used to fill the position of philosopher at different times and places over the past 2 500 years *The Philosopher* does just that providing a new way of looking at the history of philosophy by bringing to life six kinds of figures who have occupied the role of philosopher in a wide range of societies around the world over the millennia the Natural Philosopher the Sage the Gadfly the Ascetic the Mandarin and the Courtier The result is at once an unconventional introduction to the global history of philosophy and an original exploration of what philosophy has been and perhaps could be again By uncovering forgotten or neglected philosophical job descriptions the book reveals that philosophy is a universal activity much broader and more gender inclusive than we normally think today In doing so *The Philosopher* challenges us to reconsider our idea of what philosophers can do and what counts as philosophy

Philosophy: What It Is and Why We Need It , The Philosophy of Philosophy Timothy Williamson,2023-10-30 *The Philosophy of Philosophy* The Blackwell Brown Lectures in Philosophy *The Philosophy of Philosophy* presents an original unified concept of philosophy as a non natural science In this provocative work distinguished philosopher Timothy Williamson challenges widely held assumptions and clarifies long standing misconceptions about the methodology and nature of philosophical inquiry The author rejects the standard narratives of contemporary philosophy developed from naturalism the linguistic turn postmodern irony and other prominent trends of the twentieth century Viewing

the method of philosophy as evolving from non philosophical pursuits Williamson provides readers with fresh insight into the self image of philosophy and offers new ways of understanding what philosophy is and how it actually works Now in its second edition this landmark volume comprises the original book and the author s subsequent work New topics include the recent history of analytic philosophy assessments of experimental philosophy theories of concepts and understanding Wittgensteinian approaches popular philosophy naturalism morally loaded examples in philosophy philosophical applications of scientific methods and many more This edition features the author s latest thoughts on a variety of issues autobiographical reflections and replies to critics The Philosophy of Philosophy Second Edition remains essential reading for philosophers scholars graduate and advanced undergraduate students in philosophy and other readers with a sustained interest in the method and rationale of the doing of philosophy

As there cannot be said to be a beaten path in philosophy and as Introductions to the subject differ widely from one another it is proper that I should give an indication of the scope of the present volume It undertakes 1 To point out what the word philosophy is made to cover in our universities and colleges at the present day and to show why it is given this meaning 2 To explain the nature of reflective or philosophical thinking and to show how it differs from common thought and from science 3 To give a general view of the main problems with which philosophers have felt called upon to deal 4 To give an account of some of the more important types of philosophical doctrine which have arisen out of the consideration of such problems 5 To indicate the relation of philosophy to the so called philosophical sciences and to the other sciences 6 To show finally that the study of philosophy is of value to us all and to give some practical admonitions on spirit and method Had these admonitions been impressed upon me at a time when I was in especial need of guidance I feel that they would have spared me no little anxiety and confusion of mind For this reason I recommend them to the attention of the reader Such is the scope of my book It aims to tell what philosophy is It is not its chief object to advocate a particular type of doctrine At the same time as it is impossible to treat of the problems of philosophy except from some point of view it will be found that in Chapters III to XI a doctrine is presented It is the same as that presented much more in detail

and with a greater wealth of reference in my System of Metaphysics which was published a short time ago In the Notes in the back of this volume the reader will find references to those parts of the larger work which treat of the subjects more briefly discussed here It will be helpful to the teacher to keep the larger work on hand and to use more or less of the material there presented as his undergraduate classes discuss the chapters of this one Other references are also given in the Notes and it may be profitable to direct the attention of students to them
