contribution to both the theoretical and practical literature on public policy it is a resource for scholars and students as well as a guide for policymakers analysts and advocates who help craft those policies in the name of progress World Development Report World Bank Staff,1998 Annotation World Development Report 1998 1999 now in its twenty first edition focuses on the role of knowledge and information as a factor of development including the important trade offs in strategies and policies and many other challenges It examines such important questions as why have some developing countries been able to exploit the rapidly increasing stock of global knowledge more than others and what can be done to help those falling behind The Report also looks at the challenge of finding the balance between private initiative and public intervention that encourages innovation and manages attendant risks It deals with the role of international assistance and international organizations which can help develop understanding about these complex processes help to transfer lessons of development experience across countries and help finance crucial knowledge investments of importance to developing countries Known as the standard reference for international economic data the World Development Report 1998 1999 provides a set of Selected World Development Indicators as an appendix presenting social and economic statistics for more than 200 countries

Failed Transition, Bleak Future? Hooman Peimani,2002-04-30 Peimani challenges the practical indifference of many Western and non Western countries with interests in Central Asia and the Caucasus to their plight Independence in 1991 suddenly worsened all the economic and social problems of the countries of the Caucasus Azerbaijan Armenia and Georgia and Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan Their failure to address their numerous economic problems and to develop their economies has created a suitable ground for the rise of social and political popular dissent including ethnic conflicts in all these multi ethnic countries Concerned about the stability of their political systems their ruling elites have all opted for authoritarianism The prevailing intolerance of dissent and the suppression of opposition political parties have paved the way for the emergence of anti government extremist ideologies and political groups The domestic situation has become ripe for the rise of violent political activities and ethnic conflicts with a great possibility for their escalation to civil wars The ethnic structure of both the Caucasus and Central Asia makes their development into interstate wars a strong possibility The unsettled ethnic and territorial conflicts within and between countries which turned into wars in the early 1990s could easily re emerge There is a potential for the further escalation of military conflicts in those regions because of the intentional or unintentional intervention of Iran China Turkey Russia and the United States which have long term interests in the two regions Given the geographical characteristics of the Caucasus and Central Asia as a link between Asia and Europe war and instability in those regions could destabilize the two continents hosting six declared nuclear powers Of particular interest to scholars and other researchers involved with Eurasian Central Asian and Caucasian countries *Changing the Conditions for Development Aid* Neils Hermes,Robert Lensink,2019-05-23 In 1998 the World Bank published a report entitled *Assessing Aid What Works What Doesn't and Why* This report presents the results of an

extensive investigation into the effectiveness of development aid The main message of the text of the report is that development aid helps but only when there is a good policy environment in the recipient countries that is when there is sound macroeconomic management and when robust government institutions exist It stresses that it is a myth to think that good policies can be bought by giving development aid giving aid conditional on policy reforms does not lead to improved economic policies The conclusion of the World Bank report is that aid flows should be directed only to countries with sound policies and that it should be focused more on supporting governments in reforming entire sectors rather than on specific development projects The Assessing Aid report has led to heated debates both among academics and policy makers about development aid and aid policies Many have questioned the methodology used the results and the policy conclusions of the report This book aims to contribute to the ongoing discussion about the future of development aid In particular it re-examines a number of issues that are crucial to the analysis and to the conclusions of the World Bank report In this study the authors aim to put the discussion on the future of development aid into perspective and summarise the main findings of the other studies in this collection They focus on two issues the aid effectiveness debate before and after the Assessing Aid report and the discussion on policy conditionality and good governance Section II provides a brief survey of past research on aid effectiveness that is before publication of the Assessing Aid report and summarises the main findings of the World Bank report on aid effectiveness In this study the authors aim to put the discussion on the future of development aid into perspective and summarise the main findings of the other studies in this collection They focus on two issues the aid effectiveness debate before and after the Assessing Aid report and the discussion on policy conditionality and good governance Section II provides a brief survey of past research on aid effectiveness that is before publication of the Assessing Aid report and summarises the main findings of the World Bank report on aid effectiveness
