## **World History:**

*World History* Clive Ponting, 2008-09-04 Conventional accounts of world history tend to focus on the rise of Western civilisation and concentrate on the story of ancient Greece the Roman empire and the expansion of Europe The histories of the great civilisations of China India and Japan and therefore the experience of the majority of the world s people have been relegated to a minor place *World History* adopts a radically different approach Starting from the assumption that the human story has to be seen in the round it examines the evolution of humans their lives as hunters and gatherers and their eventual adoption of agriculture before looking at the emergence of civilisation across the globe in Mesopotamia Egypt China the Indus Valley Mesoamerica and Peru It goes on to tell the story of the earliest empires emphasising not just their differences but also their similarities It explains how contacts were established between them and how technologies ideas and the world s great religions travelled from one to another It describes the great empires of Islam of China and of the Mongols Only towards the end of the story does Europe come slowly to dominate the world against the background of technical innovations and social and economic change

**Historiography** Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures Palgrave Advances in World Histories M. Hughes-Warrington, 2004-10-14 World histories vary widely in shape structure and range in space and time In Palgrave Advances in World Histories ten leading world historians examine the many forms of world history writing offering an accessible engaging and comprehensive overview of what it is and what world historians do This work is a valuable introduction to those new to the field but will also stimulate discussion debate and reflection **World History** Hutton Webster, 1923 *Library of Congress Subject Headings* Library of Congress, 2003

**Analysing Historical Narratives** Stefan Berger, Nicola Brauch, Chris Lorenz, 2021-05-14 For all of the recent debates over the methods and theoretical underpinnings of the historical profession scholars and laypeople alike still frequently think of history in terms of storytelling Accordingly historians and theorists have devoted much attention to how historical narratives work illuminating the ways they can bind together events shape an argument and lend support to ideology From ancient Greece to modern day bestsellers the studies gathered here offer a wide ranging analysis of the textual strategies used by historians They show how in spite of the pursuit of truth and objectivity the ways in which historians tell their stories are inevitably conditioned by their discursive contexts Diverging Time David Carvounas, 2002-01-01 Temporal divergence creates a need for new narratives and paradigms In Diverging Time David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways **Resources in Education** , 1985 World History: The Basics Peter N.
