**Mindfulness, Mind-body Exercises, and Health Promotion** Guodong Zhang, Yang Cao, Zi Yan,2025-02-14 High intensity sports and physical exercise have been linked to various health benefits However when it comes to increasing longevity these activities may not be an ideal option for the general population Mind body exercise which

combines physical exercise with mindfulness may be more effective in promoting and restoring health especially for those with chronic symptoms or poor health conditions Many mind body exercises such as Taichi Qigong Chan Chuang and Yoga have their roots in Eastern cultures They have gained popularity around the world and became a new fashion in the post COVID 19 era These exercises typically help practitioners shift their focus from the outside world past or future to the present moment through gentle body movements Mind body exercises emphasize the body s innate ability to heal itself By disconnecting from the noisy outside world the body is given the opportunity to heal This aligns with the classic belief in Chinese medicine that the body itself is the best medicine
