

The Soviet Legacy

On July 13, 1944 the Soviet troops entered and occupied Vilnius, the capital of Lithuania. The rest of the country fell in a matter of a few days. The small Baltic state remained in oppression for the next five decades.

Its citizens lived through horrors difficult to even think about. They had jobs but many companies were inefficient. They could not always buy enough food for their families. Their religion was suppressed and the local language forbidden. And worst of all, their friends, family members and neighbours could be shipped to labour camps in Siberia without any notice, never to return.

Lithuania was not the only country to go through this. The Soviets took control of 15 countries by force at the end of the Second World War. Its government influenced the lives of nearly 291 million people.

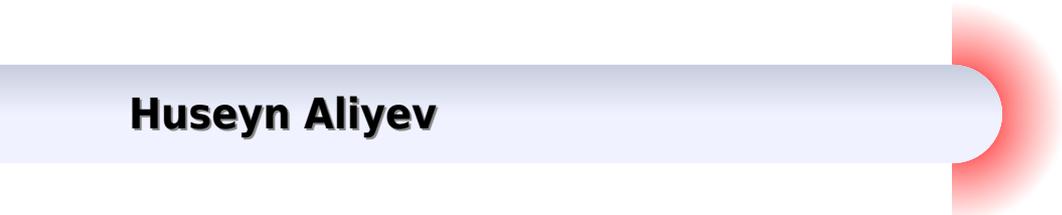

It has now been 30 years since the collapse of the Union. So how are the former USSR countries doing today? Even though they have made economic and social progress, the legacy from the years of oppression is still present. In this visualisation, we explore how these countries compare to the rest of the world in terms of mental health, politics and economy.

The Soviet Legacy in Central Asia J. Glenn, 1999-08-05 This book analyses the new pattern of security concerns of the Central Asian successor states This region is said to encompass Kazakhstan Uzbekistan Tadjikistan Kirghizstan and Turkmenistan The main contention of the book is that the security problems of these states are similar to those that faced other Third World countries after they attained independence That is due to the arbitrary creation of these states by external powers they lack a certain degree of societal cohesiveness arising from the fact that several ethnic communities reside within their borders It is this so called insecurity dilemma of each of the Central Asian states that is therefore examined

The Legacy Structure of Russia's One Hundred Year Transformation David Foley, 2018-11-16 Research and analysis of the post Soviet Russian experience of political economic and social change have generally focused attention on the complications and influences of the Soviet legacy on the transition process with most early main stream studies emphasizing the difficulties of the adoption of the institutions of democracy and a free market economy to the centralized command and control legacy structures carried over from that adjacent system to the more recent analyses that have attempted to explain why the Putinist hybrid authoritarian democracy emerged to take control of the Russian state The complex nature of the Russian experience of political social and economic change had yet to be explained as a long term legacy analysis until now with the linkages presented in this study of the legacies and structures that have defied attempts at reform by the Bolsheviks the Soviets and the modern Republicans The political geography of Russia represents a districting system that defines the people and places and represents an influential legacy structure that has had a long reach from the Russia of Imperialism to the Russia of Putinism and the twenty first century A clearer understanding of the influences the Imperial legacy brings to the Russian transformation enables the student of post Soviet Russian transition an opportunity to contextualize the strong linkages of historical governance structures with the one hundred years of Bolshevik and Soviet system capture and the struggles of transformation faced by the government and people of Russia today

Post-Communist Civil Society and the Soviet Legacy Huseyn Aliyev, 2015-08-11 This book argues that the weakness of civil society in the post Soviet Caucasus is a result not only of post communist political and economic problems but also of the effects of historical legacies These influence both formal and informal civil societies and weaken the countries ability to facilitate democratisation
