Soviet Science Under Control The Struggle For Influence

Eric H. Boehm

Soviet Science Under Control The Struggle For Influence:

Soviet Science under Control Jeffrey L. Roberg, 2016-07-27 Roberg examines the relationship between the political leadership of the Soviet Union and Soviet science Previously this relationship was typically characterized as one of Communist Party dominance over the sciences He argues that the relationship between scientists and the leadership is better viewed as bi directional The author concludes that scientists had an influence on policy makers in the areas of nuclear policy and human rights although not to the same degree as the Party had on science and scientists

Science, (Anti-)Communism and Diplomacy, 2019-10-01 From 1957 onwards the Pugwash Conferences brought together elite scientists from across ideological and political divides to work towards disarmament Through a series of national case studies Austria China Czechoslovakia East and West Germany the US and USSR this volume offers a critical reassessment of the development and work of Pugwash nationally internationally and as a transnational forum for Track II diplomacy This major new collection reveals the difficulties that Pugwash scientists encountered as they sought to reach across the blocs create a channel for East West dialogue and realize the project s founding aim of influencing state actors Uniquely the book affords a sense of the contingent and contested process by which the network like organization took shape around the conferences Contributors are Gordon Barrett Matthew Evangelista Silke Fengler Alison Kraft Fabian L scher Doubravka Ol kov Geoffrey Roberts Paul Rubinson and Carola Sachse

The Undergrowth of Science: Delusion, Self-Deception, and Human Frailty Walter Gratzer, 2001-09-13 Walter Gratzer s themes in the stories he relates in this book are collective delusion and human folly Science is generally seen as a process bound by rigorous rules which its practitioners must not transgress Deliberate fraud occasionally intrudes but it is soon detected the perpetrators cast out and the course of discovery barely disturbed Far more interesting are the outbreaks of self delusion that from time to time afflict upright and competent researchers and then spread like an epidemic or mass hysteria through a sober and respectable scientific community When this happens the rules by which scientists normally govern their working lives are suddenly suspended Sometimes these episodes are provoked by personal vanity an unwillingness to acknowledge error or even contemplate the possibility that a hard won success is a will o the wisp at other times they stem from loyalty to a respected and trusted guru or even from patriotic pride and worst of all they may be a consequence of a political ideology which imposes its own interpretation on scientists observations of the natural world Unreason and credulity supervene illusory phenomena are described and measured and theories are developed to explain them until suddenly often for no single reason the bubble bursts leaving behind it a residue of acrimony recrimination embarrassment and ruined reputations Here then are radiations measured with high precision yet existing only in the minds of those who observed them the Russian water which some thought might congeal the oceans phantom diseases that called for heroic surgery monkey testis implants that restored the sexual powers of ageing rouses and of tired sheep truths about genetics and about the nature of matter perceptible only to Aryan scientists in

the Third Reich or Marxist ideologues in the Soviet Union and much more The Undergrowth of Science explores in terms accessible to the lay reader the history of such episodes up to our own time in all their absurdity tragedy and pathos

Russia's Turn to Persia Denis V. Volkov, 2018-08-16 Draws on recently declassified and unpublished sources to provide an original and in depth analysis of Russian and Soviet Iranian studies **Making Global Knowledge in Local Contexts**

Katarzyna Kaczmarek, 2020-04-08 This book draws on extensive ethnographic research undertaken in Russia to show how the wider sociopolitical context the political system relationship between the state and academia as well as the contours of the public debate shapes knowledge about international politics and influences scholars engagement with the policy world Combining an in depth study of the International Relations discipline in Russia with a robust methodological framework the book demonstrates that context not only bears on epistemic and disciplinary practices but also conditions scholars engagement with the wider public and policymakers This original study lends robust sociological foundations to the debate about knowledge in International Relations and the social sciences more broadly In particular the book questions contemporary thinking about the relationship between knowledge and politics by situating the university within rather than abstracting it from the political setting The monograph benefits from a comprehensive engagement with Russian language literature in the Sociology of Knowledge and critical reading of International Relations scholarship published in Russia This text will be of interest to scholars and students in International Relations Russian and Post Soviet Studies the Sociology of Knowledge Science and Technology Studies and Higher Education Studies It will appeal to those researching the knowledge policy nexus and knowledge production practices **Holographic Visions** Sean F.
