Environmental Research Papers , *Fluid Sciences and Materials Science in Space* H.U. Walter,2012-12-06 The peaceful use of space flight systems for research and technological developments in the context of promoting European and international cooperation represents the essential motivation for the programmes of the European Space Agency ESA One of ESA s programmes is dedicated to microgravity research which is now an established discipline in Europe with a dedicated group of scientists participating The Challenger disaster has resulted in a serious discontinuity of flight opportunities in the next few years but the forthcoming International Space Station new launchers and reentry vehicles are expected to provide ample opportunities for microgravity research in the long term Meanwhile parabolic aircraft flights sounding rockets as well as the delayed Shuttle dependent missions Spacelab D 2 the IML missions and EURECA I will be employed to keep microgravity experimenters reasonably busy in the interim period To prepare the ground for these activities both regarding research and experiment facilities an in depth analysis of the state of the art is an essential requirement at this time Such an analysis is presented in this volume It addresses all of the topics that have been identified to be of relevance Besides a presentation of the fundamental aspects justifying microgravity research the results of experiments already performed are reviewed and recommendations for future activities are made Close to fifty European scientists have cooperated in the preparation of this volume and their dedicated and concerted effort is greatly appreciated Earth Resources ,1982
