Shahrokhi, George A. Hazelrigg, R. J. Bayuzick, 1990 space commercialization activities are mainly in the areas of telecommunication and Earth observation The commercial use of space for microgravity processing remains elusive The reasons for this are the knowledge base for microgravity processing is inadequate and flight opportunities and hardware are too expensive lengthy and risky to provide a reasonable return on investment Furthermore previous unrealistic predictions of large benefits from space manufacturing of crystals biomaterials and other materials have created a negative image of microgravity opportunities especially in connection with the justification of manned space flights and the construction of a large space infrastructure This volume reports on the progress in Space Commercialization activities Space Commercialization F.
