Space Oxford In Association With Science:

Organisational Space and Beyond Karen Dale, Sytze F. Kingma, Varda Wasserman, 2018-06-14 Through the focus on organizational space using the reception and significance of the seminal work on the subject by sociologist Henri Lefebvre this book demonstrates why and how Lefebvre's work can be used to inform and elaborate organisational studies especially in view of the current interest in the socio-material dimension of organisations As the spatial turn in organisational research exposed the importance of spatial design in inducing power and cultural relations Lefebvre's perspective has become an inspiring theoretical framework However Organisational Space and Beyond explores how Lefebvre's work could be of a much wider relevance especially given his profound theoretical engagement with diverse schools of philosophical and sociological thought including Nietzsche Marx Sartre and Foucault This book brings together a range of authors that collectively develop a broader understanding of Lefebvre's relevance to organizational studies including areas of management concern such as strategy and diversity studies and ultimately draw on Lefebvre's work to rethink reimagine and reshape scholarship in organisational studies It will be of relevance to researchers academics students and organizational professionals in the fields of organisation studies management studies cultural studies architecture and sociology

Urban Knowledge and Innovation Spaces Tan Yigitcanlar, Melih Bulu, 2018-10-19 The expansion of knowledge economy globalization and economic competitiveness has imparted importance of knowledge and innovation in local economies worldwide As a result integrating knowledge generation and innovation considerations in urban planning and development processes has become an important agenda for establishing sustainable growth and long term competitiveness of contemporary cities Today making space and place that concentrate on knowledge generation and innovation is a priority for many cities across the globe Urban knowledge and innovation spaces are integrated centres of knowledge generation learning commercialization and lifestyle In other words they are high growth knowledge industry and worker clusters and distinguish the functional activity in an area where agglomeration of knowledge and technological activities has positive externalities for the rest of the city as well as firms located there Urban knowledge and innovation spaces are generally established with two primary objectives in mind to be a seedbed for knowledge and technology and to play an incubator role nurturing the development and growth of new small high technology firms and to act as a catalyst for regional economic development that promotes economic growth and contributes to the development of the city as a knowledge or innovative city This book contains chapters reporting investigation findings on different aspects of urban knowledge and innovation spaces such as urban planning and design innovation systems urban knowledge management and regional science It was originally published as a special issue of the Journal of Urban Technology

Complexity Theory and the Social Sciences David Byrne, Gillian Callaghan, 2022-09-26 This expanded and updated edition of Complexity Theory and the Social Sciences The State of the Art revisits the use of complexity theory across the social sciences and demonstrates how complexity informs approaches to various contemporary

issues in the context of the COVID 19 pandemic widening social inequality and impending social and ecological catastrophe wrought by global warming The book reviews complexity theory in the practice of the social sciences and at their interface with ecological science It outlines how social theory can be reconciled with complexity thinking and presents a review of the way research can be done using complexity theory The book suggests how complexity theory can be used to understand and evaluate governance processes particularly with regard to social inequality and the climate crisis The impact of the COVID 19 pandemic is also examined through a complexity lens reviewing how complexity thinking has been employed in relation to the pandemic and how implementing a complexity framework can transform health and social care The book concludes with a call to action and the use of complexity theory to inform critical thinking in the education system This textbook will be immensely useful to students and researchers interested in social research methods social theory business and organization studies health education urban studies and development studies

Organizational Spaces Alfons van Marrewijk, Dvora Yanow, 2010-01-01 Organizational Spaces explores a wide range of interfaces between built spaces and organizational actors including the ways the former can potentially affect and shape the behaviours and acts of employees at all levels as well as clients other visitors and onlookers Using innovative interpretive methods the book provides detailed empirical and theoretical analyses of field research that focus on the meanings that organizational spaces can communicate to multiple audiences Scholars and graduate students in the areas of organizational culture cultural change and intervention in organizations international business design sciences as well as in organizational studies more broadly should not be without this important and highly original resource
