Spaces Wild & Tame Richard Grossinger,1971      Skylab, Classroom in Space Lee R. Summerlin,1977 Describes experiments proposed by high school students performed by astronauts on Skylab      **Io** ,1973      **Critique of Information** Scott Lash,2002-01-21 This penetrating book raises questions about how power operates in contemporary society It explains how the speed of information flows has eroded the separate space needed for critical reflection It argues that there is no longer an outside to the global flows of communication and that the critique of information must take place within the information itself The operative unit of the information society is the idea With the demise of depth reflection reflexivity through the idea now operates external to the subject in its circulation through networks of humans and intelligent machines It is these ideas that make the critique of information possible This book is a major testament to the prospects of culture politics and theory in the global information society      Encyclopaedia of Mathematics Michiel Hazewinkel,2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques      Macmillan's Magazine ,1874      **Topological Imbeddings in Euclidean Space** Lioumila Vsevolodovna Keldysh,1968 This monograph is devoted to a presentation of the foundations of the set theoretical theory of topological imbeddings in Euclidean space and of a number of new results in this area Introduction      The Principles of Psychology: Sensation ; Imagination ; Perception of "things" ; Perception of space ; Perception of reality ; Reasoning ; Production of movement ; Instinct ; Emotions ; Will ; Hypnotism ; Necessary truths and the effects of experience William James,1918      Matematychni studii ,2000      Baseball Issue ,1971      The Boy in the Bush David Herbert Lawrence,Mary Louisa Skinner,1930      **MacMillan's Magazine** Sir George Grove,David Masson,John Morley,Mowbray Morris,1874      **Locke's National Monthly** ,1873      **The Handy Natural History** Ernest Protheroe,1910      **An**
