Spain and the Process of European Integration, 1957-85 J. MacLennan, 2000-10-04 This book examines the process of Spanish integration into the European Community from 1962 when Spain under the Franco regime applied to the European Community to 1985 when democratic Spain became a member of the EEC It aims to prove that first the European Community was the crucial external factor determining political change in Spain and secondly that Europeanism was a mechanism of political change as it was the only aim which unified the whole political spectrum from the Francoist establishment to the democratic opposition *Spain and the Process of European Integration, 1957-85* NA NA, 2001-02-03 This book examines the process of Spanish integration into the European Community from 1962 when Spain under the Franco regime applied to the European Community to 1985 when democratic Spain became a member of the EEC It aims to prove that first the European Community was the crucial external factor determining political change in Spain and second that Europeanism was a mechanism of political change as it was the only aim which unified the whole political spectrum from the Francoist establishment to the democratic opposition

Perspectives of National Elites on European Citizenship Nicolò Conti, Maurizio Cotta, Pedro Tavares de Almeida, 2014-04-10 Over the last two decades the process of European integration has become interwoven with the theme of citizenship and the debate on the democratic quality of the EU and of its institutions has become more salient What are the views about Europe which emerge when we interrogate the national elites of the four large South European countries Greece Italy Portugal Spain and what is their vision of a supra national citizenship in its different facets Are these views sufficiently homogeneous and do they distinguish themselves from those of the rest of the European Union to the point of enabling us to talk about a distinctive region of Europe Which interpretation s of European citizenship emerges from a systematic exploration of these opinions Using a set of survey and textual data collected in the framework of the IntUne project the authors attempt to provide some original answers to these questions This book was published as a special issue of South European Society and Politics *Europeanisation and Party Politics* Erol Kùlahci, 2012-05-01 A sophisticated theoretical framework and up to date analysis of the Europeanisation of domestic party systems and political parties policy stances This book covers a range of contemporary topics party systems policy stances of political parties opposition co operation over European integration cleavage theory of party response to European integration domestic depoliticisation and EU representation It presents a sophisticated political analysis of Europe and an exceptional amount of factual information about European countries and parties

Elites and Democratic Transitions by Regime Transformation in Southern Europe Ioannis Tzortzis, 2022-09-16 This book examines three cases of democratic transitions by self transformation of the non democratic regimes in Southern Europe the Spanish reforma pactada ruptura pactada of 1976 77 the Greek Markezinis experiment of 1973 and the Turkish democratic transition of 1983 in a comparative perspective The author argues that a democratic transition initiated by the regime elites is in contrast to widely held

assumptions and notwithstanding some reservations on whether democracy can be re introduced by non democrats worth viewing as a window of opportunity for democratisation It is up to the democratic counter elites to respond to it using the civil society and the international factor as allies to achieve their goal of acquiring more concessions from the regime

Margins for Manoeuvre in Cold War Europe Laurien Crump,Susanna Erlandsson,2019-11-28 The Cold War is conventionally regarded as a superpower conflict that dominated the shape of international relations between World War II and the fall of the Berlin Wall Smaller powers had to adapt to a role as pawns in a strategic game of the superpowers its course beyond their control This edited volume offers a fresh interpretation of twentieth century smaller European powers East West neutral and non aligned and argues that their position vis vis the superpowers often provided them with an opportunity rather than merely representing a constraint Analysing the margins for manoeuvre of these smaller powers the volume covers a wide array of themes ranging from cultural to economic issues energy to diplomacy and Bulgaria to Belgium Given its holistic and nuanced intervention in studies of the Cold War this book will be instrumental for students of history international relations and political science

The Human Rights Breakthrough of the 1970s Sara Lorenzini,Umberto Tulli,Ilaria Zamburlini,2021-12-16 During the 1970s human rights took the front stage in international relations fuelling political debates social activism and a reconceptualising of both East West and North South relations Nowhere was the debate on human rights more intense than in Western Europe where human rights discourses intertwined the Cold War and the European Convention on Human Rights the legacies of European empires and the construction of national welfare systems Over time the European Community EC began incorporating human rights into its international activity with the ambitious political will to prove that the Community was a global civilian power This book brings together the growing scholarship on human rights during the 1970s the history of European integration and the study of Western European supranational cooperation Examining the role of human rights in EC activities in Latin America Africa the Mediterranean Eastern Europe and the Soviet Union The Human Rights Breakthrough of the 1970s seeks to verify whether a specifically European approach to human rights existed and asks whether there was a distinctive European voice in the human rights surge of the 1970s

Counter-terror by proxy Emmanuel Pierre Guittet,2021-08-10 Between 1983 and 1987 mercenaries adopting the pseudonym GAL Grupos Antiterroristas de Liberaci n Antiterrorist Liberation Group paid by the Spanish treasury and relying upon national intelligence support were at war with the Basque militant group ETA Euskadi e Ta Askatasuna Basque Country and Freedom Over four years their campaign of extrajudicial assassinations spanned the French Spanish border Nearly thirty people were killed in a campaign comprised of torture kidnapping bombing and the assassination of suspected ETA activists and Basque refugees This establishment of unofficial counterterrorist squads by a Spanish Government was a blatant detour from legality It was also a rare case in Europe where no less than fourteen high ranking Spanish police officers and senior government officials including the Minister of Interior himself were eventually

arrested and condemned for counter terrorism wrongdoings and illiberal practices Thirty years later this campaign of intimidation coercion and targeted killings continues to grip Spain The GAL affair was not only a serious example of a major departure from accepted liberal democratic constitutional principles of law and order but also a brutal campaign that postponed by decades the possibility of a political solution for the Basque conflict Counter terror by proxy uncovers why and how a democratic government in a liberal society turned to a dirty war and went down the route of illegal and extrajudicial killing actions It offers a fuller examination of the long term implications of the use of unorthodox counter terrorist strategies in a liberal democracy

Contemporary European History, 2004

The European Commission, 1958-72 Michel Dumoulin, 2007 The ink on the Treaties of Rome of 25 March 1957 was hardly dry when the Commission set itself up for business on 1 January 1958 in Brussels with an agenda covering all areas of the economic life of the six founder countries Germany France Italy and the three Benelux countries of Belgium Luxembourg and the Netherlands The 15 year period from 1958 to 1972 covered by this work corresponds to the beginnings of the European Commission whose first task was to come up with practical means of achieving the treaties main objective the establishment of a common market taking as its point of departure the general interest of the entire Community of six Member States Forged by men and women with often very different backgrounds the history of the first few years is one of crises but also of achievements which shaped the major milestones of European integration in almost every area Imagination long term vision enthusiasm and tenacity seem to have been the great virtues of the people working for the young European institution at that time By piecing together over a number of years the recollections of former Commission officials a consortium of university teachers under the direction of Professor Michel Dumoulin of the Catholic University of Louvain at Louvain la Neuve has at last made it possible to tell the story of what happened during those early days This is a new edition of the book originally published in 2007 A similar project has since resulted in the publication of a book about the history of the Commission between 1973 and 1986 Editor

Historical Dictionary of the European Union Joaquín Roy, Aimee

Kanner,2006-06-26 Over half a century old and continuing to grow in strength and authority the European Union consists of 25 member states with more on the waiting list and a population of 450 million people Its influence in foreign and domestic affairs and human rights and law reaches far beyond its earlier fields of trade and politics From the initial ideas about integration leading to the Treaty of Paris and the creation of the European Coal and Steel Community to the current reflection on the Treaty establishing a Constitution for Europe the Historical Dictionary of the European Union encompasses the most basic elements of the EU and the components that have emerged as a result of them Through the use of maps photographs a list of acronyms a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on topics such as leaders personalities institutions enlargements member states internal policies external relations basic theories treaties and law this dictionary tells a clear and complete story about the European Union that will assist those with greater interest in understanding it *Spain* Joseph Harrison,David Corkill,2004 Written in a straight forward and engaging manner *Spain A Modern European Economy* engages with research from a wide variety of disciplines and will be of interest to anyone with a specific interest in modern Spain or a wider interest in economic development within the frame work of the European Union Perhaps more than any other European country Spain has undergone a remarkable transformation in the post war period To the surprise of many it has succeeded in making the leap from a predominantly agricultural and politically repressed country to a modern European democracy with a diversified economy containing important manufacturing and service sectors Yet despite the fact that at the beginning of the twenty first century Spain is the world s eighth largest economy old stereotypes that see the Iberian nation as an inflexible unchanging society persist
