Spatial Multimedia And Virtual Reality:

Spatial Multimedia and Virtual Reality Antonio S. Camara, Jonathan Raper, 1999-06-17 The intersection of two disciplines and technologies which have become mature academic research topics in the 1990s was destined to be a dynamic area for collaboration and publication However until now no significant book length treatment of the meeting of GIS and Virtual Reality has been available This volume puts that situation to rights by bringing these together to cement some common understanding and principles in a potentially highly promising area for technological collaboration and cross fertilisation The result is a volume which ranges in subject matter from studies of a Virtual GIS Room to Spatial Agents and from an Environmental Multimedia System to Computer Assisted 3D Geographic Education All the contributors are well known international scientists principally from the computational side of GIS It will be a valuable resource for any GIS researcher or professional looking to understand the leading edge of this fertile field

Multidimensional Geographic Information Science Jonathan Raper, 2000-11-23 The way people normally view a GIS is 2 dimensional a greatly limiting form However as developments occur within the field researchers and practitioners are finding ways to make a GIS 3 dimensional and in some instances even 4 dimensional Being able to view a GIS in more than 2 dimensions greatly enhances its usability This forward looking text looks at the ways in which 3 and 4 dimensional multidimensional GIS can be incorporated into the area in the future using a variety of programming techniques The author of this unique book also discusses current examples and uses of multidimensional GIS in the field and shows the way forward for users in the coming years

Virtual Reality in Geography Peter Fisher, David Unwin, 2001-11-22 *Virtual Reality in Geography* covers through the window VR systems fully immersive VR systems and hybrids of the two types The authors examine the Virtual Reality Modeling Language approach and explore its deficiencies when applied to real geographic environments This is a totally unique book covers all the major uses and methods of virtual reality used by geographers The authors have produced a CDROM that comes with the book of virtual reality images that will be a fascinating companion to the text This book will be of great interest to geographers computer scientists and all those interested in multimedia and computer graphics
