Spatial Strategies In Retailing:

Spatial Strategies in Retailing R. Laulajainen, 2012-12-06 Locational research has long been concerned with industrial plants and the site selection of retail stores The major determinants and decision processes now seem to be fairly well understood Consequently the research frontier in retailing has shifted to a higher spatial level the location of stores in the regional and national context Certainly stores tend to be found where the population is but beyond this obvious truth it is by no means outright clear how retailing companies with different formats and home bases perceive space and how space affects their performance if at all When the question is put this way what appears trivial at first undergoes a change and seems now complex enough to be worth a closer look It need not be true to cite the most obvious of examples that regions which are attractive as places of living for high school and college students the customary data base are also worthwhile from the business point of view No attempt is made here to penetrate the topic at analytical depth The ambition is simply to discover with the help of numerous descriptive examples whether any order does exist in the high level spatial behavior of retailing companies

Retail Geography Shuguang Wang, Paul Du, 2020-05-26 The retail sector is an integral part of a national economy From the political economy perspective all consumer goods have surplus values locked up in them the surplus values are not realized until the consumer goods are purchased by consumers through various distribution channels As such retailing is the essential link between production and consumption The success of a retail business depends on two general factors the location of the retail outlet and management of the business Both factors are equally important If the business is located in the wrong place with the wrong customer base it will not generate expected sales Similarly if the business is poorly managed and operated it will not perform well even if the location is right Influenced by both traditional and new location theories Retail Geography is conceptualized and organized using the retail planning process as the framework The technical and methodological chapters help guide the reader with detailed descriptions of the techniques and are supported with practical examples to reflect the latest software development Retail Geography provides a state of the art summary and will act as a core textbook for undergraduate and graduate students of economic geography interested in specializing in retail and business geography The practical examples also make it a valuable handbook for practitioners in the field as well as students of retail management and commercial real estate management

Retailing: Comparative and international retailing A. M. Findlay, Leigh Sparks, 2002

Geomarketing Gérard Cliquet, 2013-03-04 This title describes the state of the art in all areas of spatial marketing discussing the various constituents which make up the geography of markets Demand varies according to location and can be measured according to revenue the number of households spending patterns and lifestyles Supply is also dependent on position because prices services products and available shops rely on location while the difference between supply and demand is the rationale for the role of the trader The book also covers the way geographic techniques help to solve marketing problems and contains chapters written by contributors with extensive

experience in this field given that it is crucial for companies to direct their marketing correctly at their target audience this will be indispensable reading for those involved in this area

Strategic Retail Management Joachim Zentes,Dirk Morschett,Hanna Schramm-Klein,2016-10-07 This book is devoted to the dynamic development of retailing The focus is on various strategy concepts adopted by retailing companies and their implementation in practice This is not a traditional textbook or collection of case studies it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study The examples are all internationally known retail companies to facilitate an understanding of what is involved in strategic retail management and illustrate best practices In the third edition all chapters were revised and updated Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication All case studies were replaced by new ones to reflect the most recent developments Well known retail companies from different countries like Tesco Zalando Hugo Boss Carrefour Amazon Otto Group are now used to illustrate particular aspects of retail management

The Retailing Industry: 1945-Retail revolutions John Benson,Gareth Shaw,1999

Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy Gómez-Suárez, Mónica,Martínez-Ruiz, María Pilar,2016-06-20 As the global market continues to recuperate from economic downfall it is essential for private label products to find ways to compete with alternatives offered by wholesale and national retailers In many cases it becomes difficult for off brand products to generate market appeal when consumers have preconceived notions about the quality of generic products and loyalty to branded products The Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy emphasizes advertising and promotional approaches being utilized as well as consumer behavior and satisfaction in response to marketing strategies and the sensitive pricing techniques being implemented to endorse generic and store brand products available on the market Highlighting brand competition between wholesalers retailers and private brand names following a global economic crisis this publication is an extensive resource for researchers graduate students economists and business professionals
