The Distributional Impact of Privatization in Developing Countries Paul Cook, Colin H. Kirkpatrick, 1994

Privatization and Poverty Kate Bayliss, 2003 This article examines the effects on poverty of privatization an impact to which donors have given little attention in their concern with efficiency and markets The analysis of the distributional impact of privatization activities draws on empirical cases in the utilities sector in a wide range of developing economies principally in Africa and Latin America After a critical consideration of the World Bank position on privatization strategies and the arguments presented by donors on the pro poor effects of these economic reforms the article turns to the negative distributional effects It is argued that privatization has demonstrably damaged the poor whether through loss of employment and income or through exclusion from or reduced access to basic services This is mainly because private firms are principally concerned with profits prices and costs and are highly selective as to sectors and types of consumer Meanwhile the weakness of governance and regulatory capacity in many developing countries lead to poor control of market abuses The article concludes by proposing that donors should take more account of local variations in state market relations and be prepared to give consideration to alternative economic strategies where privatization is not working as intended

The Market and the Masses in Latin America Andy Baker, 2009-03-23 What do ordinary citizens in developing countries think about free markets Conventional wisdom views globalization as an imposition on unwilling workers in developing nations concluding that the recent rise of the Latin American left constitutes a popular backlash against the market In this book Baker marshals public opinion data from eighteen Latin American countries to show that most of the region s citizens are enthusiastic about

globalization because it has lowered the prices of many consumer goods and services while improving their variety and quality Among recent free market reforms only privatization has caused pervasive discontent because it has raised prices for services like electricity and telecommunications Citizens sharp awareness of these consumer consequences informs Baker s argument that a political economy of consumption has replaced a previously dominant politics of labor and class in Latin America *Privatization and Equity* V.
