Bennett,Mendon Books,2014-10-22 Bulldogs Dog Books for KidsTable of ContentsIntroductionChapter 1 Early HistoryChapter 2 Fascinating Features CareChapter 3 Amazing Yorkie facts Conclusion A Great CompanionAuthor BioIntroductionDogs are not our whole life but they make our lives whole Roger Caras Bulldogs are heavy set dogs with lots of muscles and a wrinkly face They have a wide head and shoulders lots of hanging skin pointy teeth and droopy eyes Their coat is shiny and short with varied colors like brindle red fawn and white This breed can weigh between 45 55 pounds And a full grown female is about 45 pounds The name of the dog might make you think isn t too friendly But the American Kennel Club says the bulldog s behavior should be equable and kind resolute and courageous not vicious or aggressive and demeanor should be pacific and dignified So this breed is known as patient friendly and kind in nature But these qualities are not by accident Over the years a lot of work has been done to turn the bulldog into a friendlier pet Today it is usually well behaved and has a loving nature It gets along well with other pets and other dogs It can also become so attached to its owner that it won t move without them And when it comes to affection the bulldog is hard to beat They would prefer to snuggle next to you than chase a ball around the yard This is one reason why they are called Couch potatoes Bulldogs are known to drool and slobber all over you They snore when they sleep they can snort often and they grunt even more And when they walk they shuffle from place to place Add a little bit

of gas often smelly into the mix and you have quite an interesting pet in your family home They also have a hard time with commands To put it simply They are stubborn as a bull dog But don t worry There is no doubt their clownish behavior goofy antics crazy faces and courageous nature will bring a smile to your face and a warm feeling to your heart For these reasons and more Bulldogs are recommended as a loving companion well deserving of the title man s best friend *The New Book of the Dog* Robert Leighton,1907 *Bulldog Breeding Guide* Vincent Bronson,2021-06-09 The Bulldog is a much different dog today than his ancestors Descended from ancient mastiff type dogs the Bulldog breed was developed entirely in England The first mention of the breed was in 1500 a description of a man with two Bolddogges at his tayle The then fierce dogs were used in a practice called bull baiting which involved the dog grabbing onto the bull s nose and roughly shaking it Bull baiting actually had a purpose it was thought to tenderize the bull s meat For many years this practice was said to thin the blood of the bull and make its flesh tender after it was butchered This belief was so strong that many areas in England had laws requiring bulls to be baited before they were slaughtered More than that it was a popular spectator sport in a time when there were no professional sports TV shows movies or video games The angry bull would toss the dog up in the air with its horns if it could much to the delight of the watching crowd The dog on the other hand would attempt to latch onto the bull usually at its snout and pin it to the ground through the force of its painful bite Upcoming bullbaitings were advertised and crowds wagered on the outcome of the struggle These early Bulldogs were taller and heavier than today s Bulldog and they were bred to be especially adept at this bloody sport Typically they crept on their bellies toward the enraged bull so he couldn t get his horns under their bodies and toss them up in the air And their wide mouths and powerful jaws were impossible for the bull to shake off once the Bulldog had a firm hold on its snout His short flat nose enabled the Bulldog to breathe while holding onto the bull s snout He needed to be tenacious to hang onto the bull no matter how much the bull tried to shake him off The Bulldog s high tolerance for pain was developed to enhance his ability to excel at this barbarous spot Even the wrinkles on his head are said to have had a purpose to direct the blood that resulted from his grip on the bull to flow away from his eyes so he wouldn t be blinded In 1835 after many years of controversy bullbaiting was outlawed in England and many thought the Bulldog would disappear since he no longer had a purpose At the time the Bulldog wasn t an affectionate companion The most aggressive and courageous dogs had been selectively bred for generations to be bull baiters They lived to fight with bulls bears and anything else that was put before them It was all they knew Despite this many people admired the Bulldog s stamina strength and persistence These few decided to save the appearance and breed them to have a sweet gentle temperament instead of the aggression needed for the baiting arena And so the Bulldog was re engineered Dedicated patient breeders started selecting only those dogs that had a docile temperament for breeding Aggressive and neurotic dogs weren t allowed to reproduce By focusing their attention upon the temperament of the Bulldog these breeders transformed the Bulldog into the gentle affectionate dog we see today *The Dog Book* James Watson,1906
