China's Foreign Political and Economic Relations Sebastian Heilmann, Dirk H. Schmidt, 2014-01-09 This balanced and thoughtful book presents a thorough analysis of the dynamics of China's foreign relations Sebastian Heilmann and Dirk H Schmidt provide a comprehensive and discriminating view of the complex often competing factors domestic influences regional tensions global uncertainties that shape Chinese foreign policy They portray the PRC as a land of multiple identities a nation that is becoming more assertive in East Asia as it explores novel approaches to its foreign economic policies while simultaneously displaying thin skinned sensitivities when confronted with international criticism The authors argue that unconventional approaches to foreign relations in particular a unique combination of long term strategies with multilevel policy experiments are driving Chinese global expansion The provocative and challenging final chapter designed to spur discussion considers China's imperial identity warring against the decentralized activities conducted in the shadow of the empire Illicit transnational guerilla like networks have thus become powerful driving forces behind the continued development of China's foreign policy as well as its foreign trade relations The authors contend that the activities of these niche nomads with their largely invisible or chameleon like presence constitute the most alarming dimension of China's foreign relations as they gain ground and resources in many parts of the world with the potential to shake the very foundations of other societies

China's International Relations in the 21st Century Weixing R. Hu, Gerald Chan, Daojiong Zha, 2000-12-13 Most people believe China's foreign behavior is driven by its growing power status in world politics Chinese leaders still firmly uphold some traditional values in foreign policy such as sovereignty territorial integrity and national unification However it is often neglected that China's behavior is also shaped by its changing perception of the globalizing world and to a large extent is a result of external pressure on China By examining the dynamics of paradigm shifts in China's foreign policy thinking this book explores the ideological sources of China's international relations in the new century With growing economic interdependence with the outside world which creates both constraints as well as incentives to adapt to the prevailing norms in contemporary international relations authors of this volume analyze indigenous Chinese sources of intellect on the paradigm shifts The concepts studied in this volume include national identity nationalism globalism multilateralism sovereignty and the role of international law in Chinese foreign policy This volume helps to shed new light on how the dynamics of paradigm shifts affect China's behavior in international affairs

China's Foreign Relations and the Survival of Autocracies Julia Bader,2014-10-30 The Chinese government has frequently been criticized for propping up anti democratic governments This book investigates the rise of China as an emerging authoritarian power By comparing China s bilateral relations to three Asian developing countries Burma Cambodia and Mongolia it examines how China targets specific groups of actors in autocracies versus non autocracies It illustrates how the Chinese non interference policy translates into support for incumbent leaders in autocratic countries and how the Chinese government has thereby profited from exploiting secretive decision making in autocracies to realize its own external interests such as achieving access to natural resources In a statistical analysis of the patterns of Chinese external cooperation and

their impact on the survival of autocratic leaders the book finds some evidence that China is more likely to target autocracies with economic cooperation However only some forms of bilateral interaction are found to increase the prospect of survival for autocratic leaders This important contribution to the understanding of both external factors of authoritarian endurance and China's foreign relations a field of study still lacking systematic investigation will be of great interest to students and researchers in Development Studies Asian Studies International Relations and International Political Economy

Foreign Relations of the PRC Robert G. Sutter, 2018-07-12 Now in a fully updated edition this cogent but comprehensive book examines the international relations of the People's Republic of China since its founding in 1949 Noted scholar Robert G Sutter provides a balanced assessment of the country's recent successes and advances as well as the important legacies and constraints that hamper it especially in nearby Asia long the focus of China's foreign policy attention Sutter demonstrates how Beijing has carefully created an image of a China that follows consistent policies based on morally correct principles but its record shows repeated episodes of sometime surprising change and frequent use of violence intimidation and coercion China's leaders he argues still fail to manage the desire for productive foreign relations with their aspirations to build Chinese security and sovereignty interests Image building efforts condition Chinese public and elite opinion to be extraordinarily sensitive self righteous and often alarmist in dealing with the many disputes China has with its Asian neighbors and the United States Advances that the PRC has made in other parts of the world focus mainly on commercial interests limiting its actual impact on world affairs Sutter shows readers how to use China's rise in nearby Asia as a reliable barometer of how important and effective the country will actually become internationally

Dynamics Vs. Tradition in Chinese Foreign Policy Motivation Yin Qian, 1999 This book presents original evidence of a previously undisclosed dark side to China's Hong Kong policy after 1982 It documents a covert program of immigration from the mainland to Hong Kong which was designed to put in place a classic fifth column of Communist loyalists to be used if all other institution based arrangements for the power transfer of the British colony to Chinese rule failed This finding is revealing and important in its own right as a contribution to study of the Hong Kong transition But the book focuses more on the broader significance of the motivation of such a fifth column policy for both the study of Chinese foreign policy and international relations theory Studies of international affairs regularly impute motives to states or their leaders Yet when it comes to analysis of the imputed motives most scholars see that as nearly impossible given the difficulty of penetrating the minds of the individual leaders concerned However a small number of scholars have taken up the challenge They believe that foreign policy motivation can be studied despite its apparent complexity and elusiveness They see the study of motivation of a given foreign policy as the only way of grasping its essence and therefore of ascertaining clues about its future development This book argues that motivation study advances our understanding of Chinese foreign policy Drawing on an investigation of existing theoretical studies of motivation it identifies and synthesises three approaches to the study of motivation that seem particularly relevant to the Chinese case perception personality and structural situational constraining factors It also analyses the historical political culture ideological and structural sources of Chinese policymaking to illustrate how these three elements can elucidate Chinese foreign policy motivation Its conclusion is then tested against the case of China's fifth column policy in Hong Kong The findings from the Hong Kong case study reflect two parallel but contradictory lines of motivation in the reform era of Deng Xiaoping a dynamic adjusting and learning process on the one hand and a strenuous effort to retain its traditional practice on the other The book concludes that despite increasing pressures for adaptation from constant and tremendous changes in global and national settings Chinese foreign policy motivation could not in the final analysis overcome the constraints imposed by its underlying doctrines and practices which had been so firmly embedded in the minds of the Communist leaders that it became a traditional mode of responding to the unknown and uncertain culture of Chinese foreign policy
