Fear Salman Akhtar,2018-05-11 Beginning with Freud s celebrated case of Little Hans psychoanalysts and psychotherapists have been intrigued with the topic of fear Eclipsed in theoretical writings by the term anxiety fear remains a pervasive expression in day to day clinical work Patients constantly talk about it One implores that we cure him of his fear of dogs Another offers the fear of aloneness as the rationale of her staying in a bad marriage Yet another avoids all athletic activity due to the fear of physical injury And a fourth one lives in utter denial of passing time to avoid facing his fear of death Despite its ubiquitous presence fear has received little direct attention in psychoanalytic literature This book aims to fill this lacuna It explicates various intensities of fear e g apprehension dread panic and terror It delineates the boundaries between fear and anxiety and demonstrates how phobic states constitute an admixture of these two emotions
