Shaping Work-Life Culture in Higher Education Laura Koppes Bryan, Cheryl A. Wilson, 2014-07-11 Shaping Work Life Culture in Higher Education provides strategies to implement beneficial work life policies in colleges and universities As compared to the corporate sector higher education institutions have been slow to implement policies aimed at fostering diversity and a healthy work life balance which can result in lower morale job satisfaction and productivity and causes poor recruitment and retention Based on extensive research this book argues that an effective organizational culture is one in which managers and supervisors recognize that professional and personal lives are not mutually exclusive With concrete guidelines recommendations techniques and additional resources throughout this book outlines best practices for creating a beneficial work life culture on campus and documents cases of supportive department chairs and administrators A necessary guide for higher education leaders this book will inform administrators about how they can foster positive work life cultures in their departments and institutions **Beyond the Skills Gap** Matthew T. Hora, 2019-01-02 2018 Frederic W Ness Book Award AAC U How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future Matthew T Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities Beyond the Skills Gap challenges this conception of the skills gap highlighting instead the value of broader twenty first century skills in postsecondary education They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy society and students Drawing on interviews with educators in two and four year institutions and employers in the manufacturing and biotechnology sectors the authors demonstrate the critical importance of habits of mind such as problem solving teamwork and communication They go on to show how faculty and program administrators can create active learning experiences that develop students skills across a range of domains The book includes in depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty first century habits of mind The study set in Wisconsin takes place against the backdrop of heated political debates over the role of public higher education This thoughtful and nuanced account enriched by keen observations of postsecondary instructional practice promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary faculty and administrators Bulletin of Higher Education India.
