Smith,2013 The study of grandparents raising grandchildren now almost two decades old has tended to have a negative bias emphasizing the difficulties such people face and the negative impact that grandparent caregiving has on them physically socially and emotionally This edited book seeks to reverse this trend by taking a positive approach to understanding grandparent caregivers focusing on their resilience and resourcefulness This method reflects a strengths based approach and the importance of benefit finding and positive coping Chapters feature information from both qualitative and quantitative studies and are written by a diverse range of professionals such as counselors psychologists geriatric social workers and nurse practitioners to provide multidisciplinary perspectives for practitioners working with grandparent caregivers Part one discusses the positive qualities that custodial grandparents possess resilience resourcefulness and benefit finding The second part considers the sociocultural aspects of resilience and resourcefulness in grandparent caregivers Finally part three presents strengths based interventions for working with custodial grandparents Practitioners will find this to be a valuable resource in their work and the field as a whole stimulating positive changes in attitudes toward and practices with grandparent caregivers Handbook of Social Work in Health and Aging Barbara Berkman,2006-02-09 The fields of health care aging and social work are often treated as discrete entities while all social workers deal with issues of health and aging on a daily basis regardless of practice specialization The Handbook of Social Work in Health and Aging is the first reference to address this reality by compiling the most current thinking on these subjects in a single volume With the population of older adults increasing as rapidly as new possibilities for their care professionals need an accessible source of specialized information about how best to serve the elderly and their families and they will find this authoritative handbook indispensable In 100 original chapters the most experienced and prominent gerontological health care scholars in the United

States and across the world provide social workers with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and supporting their families The contributing authors paint rich portraits of a variety of populations that social workers serve and arenas in which they practice followed by detailed recommendations of best practices for an array of physical and mental health conditions Its unprecedented attention to diversity global trends and implications for research government policy and education make the publication of such a compendium a major event in the field of gerontological social work Ambitious and multi dimensional this handbook represents the best research on health and aging available to social workers today
