World And Lifeworld:

Lifeworld-Oriented Social Work Susann Bialas, 2021-11-12 Research Paper undergraduate from the year 2008 in the subject Social Work grade 1 University of Cooperative Education Villingen Schwenningen language English abstract The terms lifeworld and lifeworld orientation are in constant use and seem to be omnipresent The lifeworld seems to be taken for granted as it is hardly ever discussed in detail or concretely distinguished from other terms such as everyday life or social space The concept of lifeworld orientation plays a major role in social education especially in child and family welfare At the latest since the Eighth Youth Report the so called lifeworld orientation has been considered a central paradigm of youth welfare Above all the educator Hans Thiersch who was also involved in the preparation of this report coined the term lifeworld orientation The discussion of lifeworld oriented social work was triggered by changes in society Today coping with everyday life requires many more preconditions such as self and social competence assertiveness or self confidence than in earlier decades when gender and generational roles educational health and nutritional concepts as well as career paths were still predetermined by stable traditions and social relations

Nature and Experience Bryan Bannon, 2016-05-18 What do we mean when we speak about and advocate for nature Do inanimate beings possess agency and if so what is its structure What role does metaphor play in our understanding of and relation to the environment How does nature contribute to human well being By bringing the concerns and methods of phenomenology to bear on questions such as these this book seeks to redefine how environmental issues are perceived and discussed and demonstrates the relevance of phenomenological inquiry to a broader audience in environmental studies The book examines what phenomenology must be like to address the practical and philosophical issues that emerge within environmental philosophy what practical contributions phenomenology might make to environmental studies and policy making more generally and the nature of our human relationship with the environment and the best way for us to engage with it

Nature and Lifeworld Carsten Bengt-Pedersen, Niels Thomassen, 1998 A persistent theme of the 20th century has been a critique of metaphysics But the limitations of this critique are manifesting themselves more and more clearly Among them is the fact that both inner and outer nature have form and structure This volume provides a comprehensive elucidation of the theoretical and practical problems of metaphysics

Developing the Global Student David Killick, 2014-06-27 Developing the Global Student addresses the question of how students of higher education can emerge from their university life better equipped to dwell more effectively ethically and comfortably amidst the turmoils of a globalizing world It does this from a number of theoretical perspectives illustrating the nature of the personal and educational challenges facing the individual student and the teaching professional The book explores the massive social changes wrought by the technologies and mobilities of globalization particularly how present and future generations will relate to work with and dwell alongside the global other It outlines a range of social psychological and intercultural perspectives on human tendencies to seek out comfort among communities of similitude and illustrates how the

experience of life in a global era requires us to transcend the limits of our own biographies and approach university education as a matter of knowledge deconstruction and identity reconstruction rather than reproduction This book brings these considerations directly into the daily business of higher education by drawing out the implications for practice at a number of levels It examines the implications of a globally interconnected world and individual biographies for the design of the curriculum a holistic view of learning in the context of the need to develop the global self what the impact on non academic practice will be if universities as institutions are to enable these changes ways in which the broader student community can transform to offer an experience which is more supportive of the development of global selves Linking theoretical perspectives to present a model of learning as change this book will be of great interest to those working in higher education and particularly to anyone involved in policy design and the delivery of the student experience

Cross Cultural Teaching and Learning for Home and International Students Janette Ryan,2013 This book maps and discusses the increasing internationalisation of teaching and learning at universities around the world This phenomenon brings both opportunities and challenges introducing what can be radically different teaching learning and assessment contexts

The Cave and the Butterfly Paul S. Chung,2011-01-01 This study offers an intercultural theory of interpretation and religion It does so by bringing Western and East Asian traditions into dialogue regarding the nature of interpretation The result of this innovative study is a theory of interpretation which integrates the socially embodied dimension of human life with the study of hermeneutics and religion in post foundational and cross cultural perspective Toward this end Paul Chung offers a constructive theology of divine speech acts in a manner more amenable to the social public sphere than other proposals In all of this he deeply considers intercultural horizon of interpretation between West and East and its implications for a theology of interpretation The result is a truly theological theory of interpretation that takes seriously the issues of intercultural studies and their intersection with Christian doctrine

A Hope for Philosophy I Ye Xiushan,2022-10-20 As the final work by Ye Xiushan one of the most famous philosophers and philosophy scholars in China this two volume title scrutinizes the historical development of both Chinese and Western philosophies aiming to explore the convergence between the two philosophical traditions Combining the historical examination and argumentation based on philosophical problematics the two volume set expounds the key figures and schools and critical thoughts in both Western and Chinese philosophical histories In this first volume the author investigates the intellectual heritage of ancient Greece and Thales of Miletus as the cradle of European philosophy freedom in Greek philosophy reason and negation in classical German philosophy and the relationship between epistemology and ontology in the philosophical history thereby illuminating the core spirit of Western philosophy and theoretical quandary facing the contemporary European philosophy This title will appeal to scholars students and general readers interested in philosophical history comparative philosophy Chinese philosophy and Western philosophy ranging over Greek philosophy German classic philosophy and contemporary continental philosophy

Home and Beyond Anthony J. Steinbock,1995 At a time in which many philosophers have concluded that Husserl's philosophy is exhausted but when the alternatives to Husserl appear to be exhausted as well this work aims to present an innovative approach to Husserlian phenomenology The author implicitly attacks the most fundamental criticism aimed at Husserl that his philosophy is intrinsically formalistic unable in principle to deal with concrete matters of life and how to live it This study of the problems and themes of a generative phenomenology normality and abnormality and the sociohistorical concepts of homeworld and generative phenomenology opens doors for a philosophy of the social world while casting new light on work done by Husserl himself

The Theory of Communicative Action: Lifeworld and system : a critique of functionalist reason Jürgen Habermas,1984 The Theory of Communicative Action represents a major contribution to contemporary social theory Not only does it provide a compelling critique of some of the main perspectives in 20th century philosophy and social science but it also presents a systematic synthesis of the many themes which have preoccupied Habermas for thirty years Times Literary Supplement Publisher

The Lifeworld of Leadership Thomas J. Sergiovanni,2000 Sergiovanni's book gives life and meaning to the words lifeworld and systemsworld bringing a new and insightful perspective to the discourse on school reform and challenges school leaders to gain a more holistic view of students and interaction in the teaching learning process Gerald N Tirozzi executive director The National Association of Secondary School Principals Once again Sergiovanni has used his remarkable and unique insight to bring clarity to a major challenge of current leadership the use of standards He has managed to contextualize the issue of standards through looking at the lifeworld of schools in a way no one else has This is a fresh and thought provoking take on a subject school leaders must understand Paul D Houston executive director American Association of School Administrators This inspiring book calls for leaders who act according to the unique culture values and needs of their schools Tom Sergiovanni examines why this lifeworld is so vital to school success and shows how local leadership can make the difference in creating healthy rigorous schools He explores the crucial link between school character and school improvement By building institutional character at the local level principals superintendents and policymakers can not only protect the lifeworld of their schools but also craft an educational system based on layered loyalties and shared accountability
