

# The world according to Kurt Vonnegut: Moral paradox and narrative form

Pettersson's dissertation examines all of Kurt Vonnegut's works to date and pays particular attention to his novels, from *Player Piano* (1952) to *Hocus Pocus* (1990).

In the introduction Pettersson presents his aims and methods, surveys previous works on Vonnegut, examines the three phases in his oeuvre, and discusses Vonnegut's relation to various literary genres. He claims that although some novels can be considered, generically, as science fiction and others as postmodern fiction, Vonnegut's literary career as a whole displays many naturalistic traits, of which the most notable is a deterministic view of mankind.

This largely neglected affinity with literary naturalism is the starting-point for the first part of the dissertation. Here Pettersson considers a central motif in the novels, "the Vonnegut paradox": the fact that Vonnegut, in the main, describes the behaviour of his characters as being strongly determined but nevertheless often stresses the moral responsibility of mankind. Pettersson maintains that Vonnegut first grapples with free will in two early novels (*Player Piano*, *Mother Night*), and then treats various types of determinism--cosmological, sociological and physiological--in most of his oeuvre, before finally making them interact with a capricious "Fate" in his two latest novels, *Bluebeard* and *Hocus Pocus*. In many of his novels the various types of determinism are formally reflected by what Pettersson terms "metafictional determinism", Vonnegut's way of summarizing--and thus determining--the action (usually the protagonist's biography) from the outset. The motif of determinism is also related to a moral responsibility which is highly valued by Vonnegut and to the humorous fictional mode within which it is expressed.

The second part of the dissertation is the first overall study of narrative form in Vonnegut. It starts out with a survey of narrative perspective and structure in the novels but, for the most part, comprises detailed analyses of four novels which span four decades in Vonnegut's career and most successfully combine deterministic motifs with narrative form: the cosmological (*The Sirens of Titan* 1959, *Slaughterhouse-Five* 1969), the sociological (*Jailbird* 1979) and the physiological (*Galapagos* 1985). However, Pettersson sees no one-to-one correspondence between form and theme and demonstrates, for instance, how "crosscutting" (alternation between simultaneous action) is the informing principle for *The Sirens of Titan* and *Galapagos*, and how *Slaughterhouse-Five* and *Jailbird* are structured by shifts between largely chronologically narrated time levels. The four analyses also include discussion of some other central motifs and techniques, such as Vonnegut's intra-allusive way of building his fictional, "Heraclitean" universe, his use of science and fiction as sources, and his--often double--allusions to such sources in the names of his characters.

In his conclusion Pettersson discusses some thematic and formal reasons underlying Vonnegut's wide readership and points out that even if Vonnegut's characters often fail to shoulder moral responsibility for their actions the satirical point is directed at the reader.

for his wife to give birth. What follows is both spine-chilling and eerie. It makes you introspect about the future of humankind, whether the earth can sustain itself at the pace at which population is growing, and about the ethics of concepts like assisted suicide. The reader pauses to wonder whether greater common good can replace love and the individual.

**The Role of Science Fiction** Stefan Weißhampel, 2008-02-26 Inhaltsangabe Abstract

Since Kurt Vonnegut passed away aged 84 earlier this year (11th April 2007), his life and work received considerable media recognition. While FOX news could not refrain from expressing rather hostile criticism in their Vonnegut obituary, admirers of Vonnegut's works reacted with angry comments to the aforementioned programme. All over the internet, bloggers expressed their regrets and wrote their own obituaries, commenting on Vonnegut's life as well as his books. Why does the death of an 84-year-old author, leaving a body of 14 novels, three collections of short stories, one compilation of fictitious interviews with dead celebrities, four works of non-fiction, five plays, and one requiem, lead to public reactions which differ so widely? How can the works of an author who persisted to write his last book on an old typewriter be so relevant for the technophiles of the blogosphere? These questions alone justify the continuation of an academic discourse on the works of Kurt Vonnegut, which has been going on for almost forty years following the publication of *Slaughterhouse Five* in 1969. Ever since that novel, critics rarely fail to mention the considerable influence of science fiction on Vonnegut's writing. Man's relationship to technology and the effects of technology on inter-human communication are central motifs in science fiction; hence the web 2.0 generation's reaction to Vonnegut's death provides an extraordinary indication that the problems pondered upon in Vonnegut's science fiction are still relevant today. However, it has to be said that most critics' references to science fiction elements in Vonnegut's works remain limited to a surface level and evoke the impression that either the scholar is not well informed about the implications of the term science fiction or fails to name his or her references. The effect of such an approach is that the works on the subject will either seem to be apologetic annexions of Vonnegut's novels by science fiction buffs and space opera fans or attempts to minimise the role of science fiction in the works of Kurt Vonnegut to mere parody. Neither impression is adequate for a thorough understanding of the role of science fiction in the works of Kurt Vonnegut. Therefore, in this paper, a coordinate system discussing the implication of the term science fiction will be set up in which Vonnegut's works can be located. In order to find a valid reference point, a fixed set of aspects will be
