Geographies of the Ocean Dr Jon Anderson, Dr Kimberley Peters, 2014-02-28 Our world is a water world Seventy percent of our planet consists of ocean However geography has traditionally overlooked this vital component of the earth's composition The word geography directly translates as earth writing and in line with this definition the discipline has preoccupied itself with the study of terrestrial spaces of society and nature This book challenges human geography's preoccupation with the terrestrial investigating the terra incognita of the seas and oceans Linking to new theoretical debates shaping the geographic discipline such as affect assemblage emotion hybridity and the more than human this volume unlocks new knowledge concerning the human geographies of ocean space The book casts adrift stable bounded and fixed conceptions of space and advances geographical understanding based on the world as becoming changing mobile and processional This ontology supports the notion that the oceans are not simply fluid in a literal way but also in a conceptual sense suggesting that the seas have their own fluid natures their own capacities and agencies which are co-fabricated with social and cultural life This book features twelve chapters authored by key academics contributing to this growing field of research The book is divided into three sections including an Introduction by the editors and a foreword by Prof Philip E Steinberg the leading scholar in the field of maritime geographies The first section of the book considers the ways in which different watery spaces from the Atlantic Ocean to the Mediterranean Sea have been conceptualized theorized and known through metaphors voyages of discovery and scientific endeavour The second section examines how oceans are experienced through various activities including driving on water kayaking in water and diving under water The final section explores the relations between human life and the nature of the sea as a material mobile and more than human space examining the influences of the ocean on the migratory practices of fishermen in Senegal to the more than human geographies of the contemporary scallop industry the historical journeys of steam ship companies and the pirate radio enterprise Oceans are fundamental to the workings of the world as we know it Critical human activities take place at sea including trade tourism migration scientific exploration and resource exploitation The water world is therefore significantly entwined with our everyday lives This book offers a novel and important contribution to an ever-emerging cross-disciplinary subject matter *Echoes in the Ocean* Sadie Jacks, 2021-09-30 They say the truth will set me free But they're the ones creating it And it's torn my life apart I just wanted to serve my kingdom My life's calling was to be a good soldier a good warrior I played by the rules upheld them lived by them What I saw

that day was permanently imbedded in my nightmares Little did I know the horrors were just beginning But then they made me seem crazy They destroyed me Ruined my life with their lies that everyone accepted as truth They ripped everyone away from me By the time they were done I even doubted myself They thought they left me broken nothing but another grain of sand on the ocean floor But just like the tide that ruled our lives echoes never die And my song only grew stronger Echoes in the Ocean is the first book in a new dark paranormal romance series by Sadie Jacks If you like mermaids political intrigue and mysteries then you don t want to miss out on this new series Get your copy today TRIGGER WARNING This book is for mature readers Please be aware that there is talk of potentially triggering topics within this book with references and or detailed descriptions of violence physical mental abuse rape suicide murder and other sensitive topics that some readers may find offensive
