**The World in the Twentieth Century** Daniel R. Brower, 2002 For one quarter semester courses in World History emphasizing the 20th century Designed as an introductory survey of world history in the 20th century this text discusses the major political and economic changes that have reshaped global relations and focuses on the forces leading to the collapse of empires and the resulting rise of nationalism throughout the world It develops the thematic argument that the single most profound global transformation in human relations during the 20th century has been the demise of all remaining empires and the emergence in their place of nation states *The Twentieth-Century World, 1914 to the Present* John C. Corbally, 2018-10-04 The Twentieth Century World 1914 to the Present introduces students to five distinct historical themes in 20th century history politics economics religion technology and the environment Each of these themes is set in a social and cultural history framework that emphasizes the commonalities and diversity in human experiences throughout the recent era This is a genuinely global textbook that takes a non nationalistic approach to history and attempts to avoid marginalising the role of non western actors and societies John Corbally explores the connections interactions and exploitations of global resources and peoples that were part and parcel of 20th century history Economically the book shows how people were connected by the spread of global capitalism and communism It explores the spread of traditional religions and philosophies all over the globe as well as looking at secular challenges It also considers how technology reached further into people s lives Ideal for undergraduate level students of 20th century history this is a book that offers a balanced multi perspective approach to recent global history helping the 21st century student understand today s world and interrogate commonly held assumptions about its history [The World in the 20th Century](#) Stephanie A.
