

Writing Observation Guide

Writing high-quality observations of children is an important part of the planning, teaching and assessment cycle of learning through play. You may have one staff member with responsibility for writing observations for their own group of key children, or staff may write observations for any child in the setting.

Observations can be used in several ways. One is to document and evidence the learning of individual children, which feeds into planning their next steps. Another use for observations is to form part of the responsive planning for the nursery or class. From observations, staff may add to or change resources to extend learning and may plan experiences and activities based around children's current interests.

A high-quality observation will include:

- information on what the child is doing/saying/creating
- precise language of skills and progression
- the curricular area(s) or the relevant experience(s) and outcome(s)
- the significance of the learning for this child (for example, whether it is the first time that they have done this independently)
- possible next steps

Next Steps

Observation notes are essential and vital to the EYF. The early years framework sets out a number of other findings about next steps. Remember that you are writing a progression map for the child. This means that learning may take a different path from the intended one. The key next steps will provide all other than to support their child's learning and evidence their achievement. It also important to show how steps add for child. The following have help to the learning process and make them to be part of the progress.
