Writing In The Humanities:

Professional Academic Writing in the Humanities and Social Sciences Susan Peck MacDonald,2010-08-20 In Professional Academic Writing in the Humanities and Social Sciences Susan Peck MacDonald tackles important and often controversial contemporary questions regarding the rhetoric of inquiry the social construction of knowledge and the professionalization of the academy MacDonald argues that the academy has devoted more effort to analyzing theory and method than to analyzing its own texts Professional texts need further attention because they not only create but are also shaped by the knowledge that is special to each discipline Her assumption is that knowledge making is the distinctive activity of the academy at the professional level for that reason it is important to examine differences in the ways the professional texts of subdisciplinary communities focus on and consolidate knowledge within their fields Throughout the book MacDonald stresses her conviction that academics need to do a better job of explaining their text making axioms clarifying their expectations of students at all levels and monitoring their own professional practices MacDonald s proposals for both textual and sentence level analysis will help academic professionals better understand how they might improve communication within their professional communities and with their students

Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns such as sentence structure and grammar to big picture issues such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.s and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing; he aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.
