**New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries** Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole *Renewable Energy, Medium-term Market Report ...*, 2012

**Proceedings of the International Conference on Law, Economic & Good Governance (IC-LAW 2023)** Abdul Kadir Jaelani, Irwansyah Irwansyah, Fokke Fernhout, Agus Raharjo, Mohd Rizal Palil, Hilaire Tegnan, Okid Parama Astirin, Sutarno Sutarno, Venty Suryanti, Pranoto Pranoto, Robbi Rahim, 2024-02-21 This is an open access book The position of Indonesia and most countries in IMF calculations facing the same challenges Each country requires the legal instruments of a good and reliable system of Government to guard against the worst possible economic turmoil Good governance is an insistence of the constitution in the economic Article 33 paragraph 5 subsequently published Constitution Number 30 Year of 2014 on Government Administration contains 17 principles of a good governance One of the important points of the principle is a government without corruption and manipulation of policy concepts in order to provide access to consolidation in politics and economy The latest Transparency International report for 2023 shows that Indonesia's corruption perception index was recorded at 34 points on a scale of 0 100 in 2022 This is a 4 point decrease from the previous year This decline in the CPI also brought down the ranking of Indonesia's CPI globally It was noted that Indonesia's CPI in 2022 ranked 110th In the previous year Indonesia's CPI was ranked 96th globally Good Governance is all aspects related to the control and supervision of the power of the Government in carrying out its functions through formal and informal institutions To implement the principles of Good Governance and Clean Government the Government must implement the principles of accountability and efficient resource management Good and clean governance will contribute to economic growth and economic growth will have an impact on human development During the last decades of 20th century the needs for a good governance has given some impacts and became a recurring theme in literature related to human development The intervention of government or the quality of government become crucially important in relation to the high achievement of human development Whereas an effort in improving society's welfare is through economic development One of dominant aspects in economic development is through legal development

Good law or policy in such country will have some impacts to the existence of good economic growth because supremacy of law is one aspect of a good governance Law supremacy is an important institution which is related to economic growth because rule of law ensures personal safety property rights unbiased contract enforcement stability of politics freedom of speech and control of corruption According to those various issues and debates on economic legal development and good governance then the Doctoral Program of the Faculty of Law Sebelas Maret University needs to hold an international conference as a place in exchanging some academic ideas in order to contributes to those legal issues with a theme

In order to address concerns governing adverse climate changes and accelerating oil prices global support for renewable energy legislation incentives and commercialization is gaining momentum To make the renewable energy sustainable it is important that the renewable energy is highly efficient It affects the global energy consumption as well as project development and management This remarkable efficiency can be attained only by invention of highly efficient renewable energy sources cheaper storage smarter grids and effective systems for capturing greenhouse gases Some of the recent advances achieved by the scientific community to make renewable energy potent and affordable include artificial photosynthesis photovoltaics carbon storage conversion of carbon dioxide to ethanol etc In this book several research articles highlighting the application of photovoltaics artificial photosynthesis wind turbines in renewable energy sector and their impact on energy consumption have been compiled Since offshore wind structures are attracting considerable interest it is critical to comprehend corrosion issues in these structures and this has been explained in Chapter 1 Furthermore in chapter

2 simulations for evaluating the performance of a hybrid wind PV generating unit for a residential house have been demonstrated. Meanwhile, some insights into an interesting concept of electromethanogenesis, which is bio-conversion of electric current into methane, has been discussed in chapter 3. It has niche applications for waste treatment and conversion of carbon dioxide into methane. Chapter 4 talks about an effective method to minimize air pollutants such as aerosols etc, which have detrimental effects on human health. Chapter 5 addresses the environmental, economic, social, governance, and demographic impact of sustainable mining and strategy to stakeholder engagement and cost effectiveness. Chapters 6-11 are a compilation of research articles on photovoltaics. They encompass topics such as strategies to enhance the efficiencies of the photovoltaics and to employ them on roof tops, their integration with batteries, and their impact on climate change, as discussed in chapter 9 and chapters 10-11 respectively. Furthermore, chapter 11 addresses useful inverter technical knowledge which benefits policy makers to mitigate ongoing inflation of electricity network tariff components. This book concludes by highlighting the advances and materials used in the field of solar fuel cells in chapters 12-14, which is another important advancement in the field of renewable energy. As a concerned global citizen, it is pertinent that the reader acquaints oneself with the recent advances in the renewable energy sector. As this book provides an insight into the various sectors of sustainable energy, I strongly believe that it caters to an audience with diverse backgrounds: students, engineers, and researchers working in the field of electrical and mechanical engineering, bio-chemistry, policy making, physics, and material science.
