Routledge Handbook on Transnational Commercial Law Bruno Zeller, Camilla Baasch Andersen, 2025-02-21 This handbook, edited by Zeller and Andersen, is an indispensable contribution to the field of transnational commercial law. With an introduction by Sir Roy Goode, this book presents perspectives on legal issues of international sales transactions as perceived by world-leading experts, exposing pragmatic and modern aspects of everything from drafting to uniform laws to dispute resolution. The book divides itself between fundamental knowledge of transnational commercial law (e.g., chapters on forum shopping, CISG, Cape Town Convention, etc.) and current and topical developments (e.g., chapters on blockchain, smart contracts, metaverse, digital assets, etc.). International or transnational trade during the past twenty years has become more and more important, outstripping domestic trade as a hallmark of economic success. Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries, so a translational element must always be considered as part of any choice of law. Addressing a global audience, as the instruments dealt with herein apply to many

states in different regions this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers
