Soviet Naval Strategy:

Soviet Naval Strategy for the Eighties Steve F. Kime, 1978

Stalin's Ocean-going Fleet Mikhail Monakov, Jurgen Rohwer, 2012-11-12 A study of the development of strategic concepts in Stalin's Navy in the context of his foreign defence policy using original archival documents translated from the Russian

Stalin's Ocean-going Fleet: Soviet Jurgen Rohwer, 2017-07-05 In this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune école model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939-41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began

The Sea in Soviet Strategy Bryan Ranft, Geoffrey Till, 1989 The rise of the Soviet Navy has been one of the most startling features of the postwar period It now sails on every sea challenges Western maritime supremacy in ways few would have believed possible until quite recently defends and extends Soviet interest around the world and could devastate whole continents if it were ordered to Is this massive increase in Soviet maritime power simply a defensive reaction to Western threats from the sea Or does the Soviet Union intend to command the seas itself What are the Soviet Navy's main tasks Where is it going in the future Bryan Ranft and Geoffrey Till two of Britain's leading maritime specialists answer some of these questions in this book by discussing the competing arguments in an informed and balanced review

The Soviet Naval Threat To Europe Bruce W. Watson, Susan M Watson, 2020-01-09 Originally published in 1989 Given the events of 1987 and 1988 the death of Admiral Sergei G Gorshkov who had served as Commander in Chief of the Soviet Navy from 1956 to 1985 and was so influential in the development of the current Soviet Navy the Soviet policy of glasnost the US Soviet arms negotiations Secretary Mikhail Gorbachev's visit to Washington President Ronald Reagan's visit to Moscow and the treaty concerning intermediate range nuclear weapons a study of the Soviet naval threat to Europe is particularly timely This study begins by examining Soviet military and naval strategy which provides a view of how the Soviets intend to use their forces Then the book explores Soviet naval capabilities and operations because a full understanding of Soviet naval power provides an understanding of the isolation that Europeans often feel In the fourth and fifth sections of the book we examine the threat to northern and southern Europe
