Solar and Space Physics National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on a Decadal Strategy for Solar and Space Physics (Heliophysics), 2014-09-25. In 2010, NASA and the National Science Foundation asked the National Research Council to assemble a committee of experts to develop an integrated national strategy that would guide agency investments in solar and space physics for the years 2013-2022. That strategy, the result of nearly 2 years of effort by the survey committee, which worked with more than 100 scientists and engineers on eight supporting study panels, is presented in the 2013 publication *Solar and Space Physics: A Science for a Technological Society*. This booklet, designed to be accessible to a broader audience of policymakers and the interested public, summarizes the content of that report.

U.S. Astronomy and Astrophysics National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on the Organization and Management of Research in Astronomy and Astrophysics, 2001-11-20. In its fiscal year 2002 budget summary document, the Bush administration expressed concern based in part on the findings and conclusions of two National Research Council studies about recent trends in the federal funding of astronomy and astrophysics research. The President's budget blueprint suggested that now is the time to address these concerns and directed the National Science Foundation (NSF) and the National Aeronautics and Space Administration (NASA) to establish a blue ribbon panel to:

1. assess the organizational effectiveness of the federal research enterprise in astronomy and astrophysics;
2. consider the pros and cons of transferring NSF's astronomy responsibilities to NASA; and
3. suggest alternative options for addressing issues in the management and organization of astronomical and astrophysical research.

NASA and NSF asked the National Research Council to carry out the rapid assessment requested by the President. This report, focusing on the roles of NSF and NASA, provides the results of that assessment.
