Space The Freemarket Frontier:

Space Edward Lee Hudgins, David Boaz, 2002 In *Space The Free Market Frontier* leading experts analyze how we can move from the current situation of limited access to space and truly make space a place where people can work play and live This book considers how we arrived at our current situation what signs hold the promise of a free market future and which policy changes might enable space to become the next free market frontier

Toward Liberty David Boaz, Edward Lee Hudgins, 2002 *Space* deals with the issues involved in opening space to private travel and more commercial ventures

Commercial Space Tourism Dirk C. Gibson, 2012 The general themes of this analysis of the commercial space tourism industry include three main topics 1 Benefits of commercial space tourism to numerous stakeholders 2 The viability of commercial space tourism 3 existing public relations solutions

Space Travel and Culture Martin Parker, David Bell, 2009-06-08 Explores the significance of the first Apollo moon landing and how the countless books films and products associated with factual space fiction had an affect on popular culture and artistic practice but not social sciences and humanities Investigates how a topic is hugely important in popular culture but almost invisible in the academy and how it makes us want to ask questions about visibility or perhaps self censorship Evaluates how little impact the space age actually had on the social sciences and humanities partly because its combination of military industrial cold war politics combined with patriarchy and big science sits uneasily with contemporary thought in these areas Provides an interdisciplinary collection of essays on various aspects of NASA the moon landing and the commercialization of space generally The book travels from hard engineering to space romance echoing the variety of attempts to blur science and culture
