God, the Multiverse, and Everything Rodney D. Holder,2017-03-02 Modern cosmology tells us that the universe is remarkably fine tuned for life If the constants of physics or the initial conditions at the Big Bang were different by the smallest of margins then the universe would have been dull and lifeless Why should the universe be so accommodating to life Many cosmologists believe that the existence of many universes can explain why ours is so special In this book Rodney Holder subjects this multiverse hypothesis to rigorous philosophical critique A multitude of problems is exposed Going substantially further than existing treatments Holder argues that divine design is the best explanation for cosmic fine tuning specifically that design by God is a superior explanation in terms of both initial plausibility and explanatory power and is therefore the most rational position to take on the basis of the cosmological data

John Barth and Postmodernism Berndt Clavier,2007 John Barth s eminence as a postmodernist is indisputable However much of the criticism dealing with his work is prompted by his own theories of exhaustion and subsequent replenishment leaving his writing relatively untouched by theories of postmodernism in general This book changes that by focusing on the relationship between Barth s aesthetic and the ideology critique of the historical avant gardes which were the first to mobilize art against itself and its institutional practices and demands Examining Barth s metafictional parodies in the light of theories of space and subjectivity Clavier engages the question of ideology critique in postmodernism by offering the montage as a possible model for understanding

Barth's fiction In such a light postmodernism may well be perceived as a mimesis of reality particularly a recognition of the collective nature of self and the world
