Ralph Waldo Emerson

Working Nation:

A Working Nation David T. Ellwood, Rebecca M. Blank, Joseph Blasi, Douglas Kruse, William A. Niskanen, Karen Lynn-Dyson, 2000-09-14 The nature of work in the United States is changing dramatically as new technologies a global economy and more demanding investors combine to create a far more competitive marketplace Corporate efforts to respond to these new challenges have yielded mixed results Headlines about instant millionaires and innovative e businesses mingle with coverage of increasing job insecurity and record wage gaps between upper management and hourly workers A Working Nation tracks the profound implications the changing workplace has had for all workers and shows who the real economic winners and losers have been in the past twenty five years A Working Nation sorts fact from fiction about the new relationship between workers and firms and addresses several critical issues Who are the real winners and losers in this new economy Has the relationship between workers and firms really been transformed How have employees become more integrated into or disconnected from corporate strategies and performance Should government step into this new economic reality and how should it intervene Among the topics investigated David T Ellwood explores and explains the apparent paradox between the steady rise in per capita national income and the stagnant wages of middle and working class workers Douglas Kruse and Joseph Blasi study relative changes in long term vs temporary work and evaluate the introduction of profit sharing schemes and high performance workplace programs William A Niskanen and Rebecca M Blank both former members of the president s Council of Economic Advisers offer their perspectives on what direction government might take to make this a working nation for everyone Though Niskanen and Blank take alternative approaches they both conclude that the primary policy emphasis ought to be on the problems of the least skilled more than on inequality per se and that a focus on childhood education and tax supports for low income working families should be of primary concern A Working Nation paints a compelling and surprisingly consistent picture of today s workplace While the booming economy has created millions of new jobs it has also lead to an alarmingly unbalanced system of rewards that puts less skilled and many middle class workers at risk This book is essential reading for those seeking the most efficient answers to the challenges and opportunities of the evolving economy

Economics of the Labour Market P. N. (Raja) Junankar, 2016-01-12 The global crisis has led to dramatic increases in unemployment rates over most of the countries of the OECD This book provides alternative explanations of this phenomenon Junankar begins with surveys of the labour market labour demand labour supply and labour force participation He argues that the growth of unemployment and long term unemployment is mainly due to a lack of aggregated demand and not due to high unemployment benefits Economics of the Labour Market shows that unemployment and long term unemployment impose serious and significant costs on individuals families and society in general Raja Junankar focuses on vital social issues arising from the malfunctioning of economies and this collection of essays tackles the real cost of unemployment

Labour Market and Social Protection Reforms in International Perspective Giuliano

Bonoli,2017-07-05 Social protection systems and labour markets have undergone major changes in the past two decades Welfare states are being reformed scaled back and modernised labour markets at the same time are more precarious more feminised more unequal and throughout the OECD area older The interaction between labour markets and social protection has become increasingly crucial to the social and economic policy mix concerning unemployment the transformation of work the new poverty and even demographics Against this background an interdisciplinary team of leading labour market and social protection experts from various OECD countries examine the multifaceted aspects of the changing relationship between social protection systems and labour markets They identify and analyse key emerging issues such as the link between employment and social protection financing the adaptation of social protection systems to women s career patterns and the development of new forms of social protection that aim at promoting employment With practical policy guides and recommendations using case studies and comparative chapters this will be engaging reading for policy makers social actors and academics alike
