

SCIENTIFIC WRITING

Useful tips to help you write better research papers

Title

Keep the title simple and specific to describe the content — but not so technical it can't be easily understood. Try to be concise.

Abstract

The abstract is short, but remember not to cram as much detail into it as possible. You want to grab the reader's attention with the first statement.

Introduction

When writing the introduction, pick out the things that are most relevant to your work and explain why. Present the background of your work while focusing on the most important issues.

Results and Discussion

- ✓ Make your R&D concise but informative.
- ✓ Focus on the important parts, not the small details.
- ✓ Remember that discussion of unexpected results is often as valuable as focusing on the expected findings.
