Spatial Policy Problems:

Spatial Policy Problems of the British Economy Michael Chisholm, Gerald Manners, 2009-06-18 Interest in the geography of economic and social change has grown in Britain over recent years as people have become more aware of regional imbalances and as government influence on the evolution of the country's spatial systems has increased. The processes of spatial allocation are becoming better understood as new techniques of analysis are developed. But weaknesses and inconsistencies in public policies remain and have attracted the attention of workers in various disciplines, particularly geographers. This awareness is reflected in these essays, most of which deal with economic rather than the social problems. They demonstrate the wide range of issues on which geographers can make a relevant contribution. *Policy Integration for Complex Environmental Problems* Helen Briassoulis, 2017-07-05 This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical, methodological, and applied issues from the perspective of selected EU policies: rural development, regional development, transport, social, economic, environmental, water resources, and biodiversity policy.

Actors and Agency in Global Social Governance Alexandra Kaasch, Kerstin Martens, 2015-10-22 *Actors and Agency in Global Social Governance* seeks to advance our understanding of the global dimension of social policy by applying the notion of global social governance on actors, their relations to each other, and their pathways, as well as their footprints of influence in the specific policy fields of social concern in which they are active. Focusing on a broad array of individual and corporate global social policy actors, ranging from internationally operating intergovernmental organizations to state formations and NGOs, the contributions to this volume draw a fuller picture of agency in global social policy than what current accounts provide. It considers the multiple facets of individual scope and legitimacy for a particular actor in conjunction with the configuration of global social governance as characterised by multi-centred and multi-scaled obstacles, as well as diverse forms of collaboration. The volume studies the contextualised actor's range and power in designing, shaping, and facilitating various global social policies. Thus, the contributions discuss the role of particular corporate actors within global social policy structures and assess the impact of a number of key organizations, states, groups, and individuals in the governance of global social policy. At the same time, a variety of social policy fields in which these actors are involved are addressed, including labour market issues, family policy, health policy, education policy, migration issues, and global redistribution via various forms of development aid or remittances.
