Theories And Methods:

Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios [Human Security Studies: Theories, Methods And Themes](#)

Sorpong Peou, 2014-03-31 Human Security Studies Theories Methods and Themes examines the concept of human security from different theoretical and methodological perspectives and shows how they help shed light on the different themes of global intervention Liberal perspectives represented by global legalism and developmentalism share the optimism that human security can be ensured and enhanced through strengthening global governance Realists remain skeptical about this liberal vision While also critical of the liberal promise critical theorists and feminists offer radical perspectives on human security All these perspectives help explain the challenges of military intervention for human protection micro disarmament international criminal justice smart sanctions human rights and democracy promotion and human development

Techniques of Close Reading Barry Brummett, 2010 Techniques of Close Reading is a brief supplemental text that trains students in an ability to see what texts be they written oral visual or mediated may be saying Renown scholar and teacher Barry Brummett explains and explores the various ways to read messages speeches cartoons magazine ads etc teaching students the ability to see deeper levels of meaning and to share those insights with others Techniques of Close Reading differs from other books in rhetorical criticism textual analysis or critical thinking by Focusing on the act and

techniques of criticism rather than on schools of thought grand theories and specific methods thus helping students to engage in the act of critical close reading in ways that are congenial to a wide range of methods for that reason it is highly adaptable to other texts currently in use that are focused on specific methods Explaining the relationships among theory methods and techniques of rhetorical criticism Examining the ethics and risk of doing and reading rhetorical criticism via plenty of examples figures and exercises taken from everyday life

Foch Raymond Recouly, 1929 **Sociological Theory, Methods, and Perspectives** Joseph H. Michalski, 2018 The current book contributes to the complicated discussion of knowledge construction by demonstrating how social scientific theories of diverse subject matter in sociology criminology and psychology can be contextualized and operationalized from distinct paradigms Each chapter introduces one or more theoretical perspectives as the authors examine explicitly or implicitly the epistemological foundations for how one might evaluate the main concepts and establish valid truth claims No one pathway to such truth claims exists as the diverse perspectives that these authors embrace shall demonstrate The monograph thus intentionally includes a range of theoretical perspectives and methodologies to highlight the case for what might be designated as scientific equifinality In effect the notion suggests that more than one pathway can be selected to help observers move closer and closer to the truth but each perspective shares in common the assumption that rigorous methodologies are required that transcend mere personal opinion The edited volume therefore promotes the value of intellectual diversity among social scientists while concurrently building upon a common theme Despite the limitations of observing the social world from their peculiar social locations analysts nevertheless can do a more effective job of wrestling with the truth by employing rigorous methodologies connected to their theoretical stances As

argued in the first chapter it requires the overcoming of several inertial conditions that often inhibit the search for deep knowledge of the subject matter Subsequent chapters demonstrate that in a variety of creative ways researchers can develop and implement innovative approaches to the study of the social world The book stands resolutely in opposition to the post truth narrative currently in vogue where no one can claim to have any more reliable or credible information than anyone else

Economic Method, Theory and Policy Kurt Wilhelm Rothschild,1995 This major title features a key selection of Professor Rothschild s work in the areas of economic methodology theory and policy Specific issues discussed include advertising price theory competition economic growth models economic forecasting the subjectivist Austrian school oligopoly Schumpeter and Austro Keynesianism

The Craft of Inquiry Robert R. Alford,1998 In his provocative new book Robert Alford proposes that the starting point for any researcher in the process and craft of inquiry should begin with an understanding of how to translate elements of his her own history personal experience and issues which can then be formulated into researchquestions He presents three basic explanatory approaches to sociology multivariate interpretive and historical and strives to illustrate the artistic rather than formulaic side of research design presenting several ways that research questions can be framed
