Fighting Vehicle was developed in the 1970s to counter the new Infantry Fighting Vehicles of the Soviet Union and its Warsaw Pact allies. Designed to survive the imagined high intensity Nuclear Biological and Chemical NBC battlefield of the Cold War it became alongside the M1 Abrams Main Battle Tank the mainstay of US armoured forces during the 1980s. As the Cold War ended however it would go on to prove its worth on other battlefields. During the First Gulf War the Bradley would destroy more Iraqi AFVs than the Abrams while during the 1990s it would prove itself an effective weapons system in the missions to Bosnia and Kosovo. During the 2003 invasion of the Iraq and the fighting that followed it confirmed its reputation as a versatile and deadly AFV. This volume examines the development and service history of both the M2 Bradley Infantry Fighting Vehicle and the M3 Bradley Cavalry Fighting Vehicle. The various modifications and improvements over its long service history are described as is the experience of the soldiers who have fought alongside and in it during the past three decades. The book also gives a full account of the wide range of kits and accessories available in all the popular scales and includes a modelling gallery covering the most important Bradley variants. Detailed color profiles provide both reference and inspiration for modellers and military enthusiasts alike.

The A to Z of the Persian Gulf War 1990 - 1991 Clayton R. Newell, 2007-02-15. Contrary to many assessments that immediately followed the end of the 1991 Persian Gulf War that war was neither short nor decisive. The 1991 conflict was the dramatic manifestation of long standing antagonisms among the principal participants and its results continue to have a profound effect on the region, a fact that can be seen most clearly in the current U S occupation of Iraq. It is therefore important to determine on the diplomatic side just how the war got started, how it was fought and whether the dramatic ground campaign should have exceeded the mere hundred hours it lasted in order to bring about a more decisive conclusion.

With the seemingly endless follow up to the war continuing The A to Z of the Persian Gulf War 1990 1991 draws together the results of assessments of the war by a multitude of commentators This is accomplished through an introduction a chronology a list of acronyms and abbreviations a bibliography appendixes and hundreds of cross referenced dictionary entries on many of the significant civilian and military persons crucial diplomatic and political actions as well as the essential military aspects including the strategy and tactics the encounters and battles and the forces and weapons deployed by both sides As the situation in the Middle East continues to deteriorate this reference provides an important historical perspective on an increasingly critical issue

Armored Car R. P. Hunnicutt,2015-09-15 The armored car has played a major role in American military operations since the relatively early days of the 20th Century In 1989 Col Royal P Davidson arranged for the installation of a 30 caliber Colt machine gun on a Duryea light three wheeled car In doing so he jump started the development and

production of armored fighting vehicles that have served in the American military ever since Although the very first armored cars were merely outfitted with a gunshield they were soon fully protected by armor plating In this installment of R P Hunnicutt s 10 volume series on the history of American armored vehicles he details their early development through WWI WWII Korea and Vietnam Beginning with the development of armored cars on American soil at the outbreak of WWI although none were ever shipped overseas Hunnicutt goes on to describe the production of armored cars based on commercial car and truck chassis in the 1920s These vehicles eventually reached limited production as the armored car M4 With detailed drawings and photographs to illustrate the history Hunnicutt describes the development of the armored car T3 which was also designated as scout car T1 The development of these lightweight scout cars which met the needs of the cavalry made the armored car unnecessary by 1937 Although production of armored cars stopped for the American military American development continued on armored cars intended for British use However in 1942 as the Palmer Board decided to limit the weight of reconnaissance vehicles the light armored car T22E2 was standardized as the M8 and put into production The M8 and a variation the M20 served in the U S Army until after the Korean War with new models developed for use in Vietnam Spanning the history of American wheeled combat vehicles Hunnicutt s Armored Car is a must have for anyone with a keen interest in the history of American military operations and equipment Jane's Armour and Artillery ,2002
