

Library Research Paper

Research Paper

The format of the research paper will be more formal than the essays you have written and much greater consideration should be given to evidence to support the ideas or opinions. It is essential that you demonstrate an informed knowledge of your topic based on sources you have researched in the library. The primary objective in writing a research paper is the clear communication of ideas expressed orderly, smoothly and in a precise manner. By developing your ideas clearly and logically, your reader is able to follow you from one thought to the next, without confusion or ambiguity. Be precise in your word usage. The aim of research writing is the efficient communication of ideas. Don't use long technical phrases just to sound scientific, especially if you do not understand what they mean.

A research paper is usually written in the past tense, but there are times when present tense may be called for. It is a good idea to use one tense or the other consistently within the paper. In striving to achieve readable prose, avoid both strings of short, choppy, declarative sentences and interminably long sentences with innumerable clauses.

Pitfalls to watch for:

1. Avoid the use of colloquial expressions or slang such as "awesome". They are usually too informal and sound juvenile.
2. Avoid references to yourself such as "I believe," "I hate it," "I think," "in my opinion" etc.
3. Try to be clear and be economical in the use of words in the sentence. However, this does not mean you should be so cryptic that it is difficult to discern the meaning of your ideas.
4. Avoid the use of too many qualifiers, e.g. "totally awesome."
5. Expressing strong personal opinions without supportive evidence.

Format of your paper

You should have at least **12 references** from academic journals and books cited in your paper. The paper must be typed with **one inch margins, double spaced, using a 12 pt New Times Roman font** should contain approximately **8 pages** of text, excluding references.

Introduction

The introductory paragraph should convey to your reader what you are going to cover in your paper. Usually an introduction will have a thesis or focus, or a generalization that will be proved or developed in the body of the paper. A good introduction will provide a smooth transition for the reader into the body of your paper, and should make the reader want to continue to read your paper.

Body of the paper

In the body of your paper, present and develop your thesis in an organized logical manner. Be sure to review specific concepts and ideas that are relevant to your thesis, and provide your readers with enough background knowledge so that they will have a clear understanding of what you will be discussing. Pay special attention to overall organization and make smooth, logical transitions between paragraphs. Headings are often very useful to provide your paper with an organization.

Summary and conclusions

The final section of your paper is the summary and conclusions which provides your reader with a transition out of the paper. You should remind your reader of your initial thesis, summarize the major issues raised in the body, and state your conclusions. A good concluding section should leave the reader satisfied with your summary and conclusions even though they may disagree with them.

practical resource gives academic librarians and school media specialists a complete instructional program for introducing students to the process of library research. The program has been tested and proven as an exceptionally effective method for guiding students in independent learning using library resources. The second edition of this highly regarded text incorporates use of newer library technologies into innovative process strategies, instructional plans, and coaching techniques. Seven basic steps of the research process are identified and described. Ready-to-use activities with worksheets are provided to help students achieve the specific task to be accomplished at each stage. In many ways, the book is more timely than when the first edition was published in 1985. Shows the reader how to harness new technology while upholding the highest standards of research. The result is a joy to read, a boon for students. Robert J. Sampson, professor of the social sciences at Harvard University. Today's researchers have access to more information than ever before. Yet the new material is both overwhelming in quantity and variable in quality. How can scholars survive these twin problems and produce groundbreaking research using the physical and electronic resources available in the modern university research library? In *Digital Paper*, Andrew Abbott provides some much-needed answers to that question. Abbott tells what every senior researcher knows: that research is not a mechanical, linear process but a thoughtful and adventurous journey through a nonlinear world. He breaks library research down into seven basic and simultaneous tasks: design, search, scanning, browsing, reading, analyzing, filing, and writing. He moves the reader through the phases of research from confusion to organization, from vague idea to polished result. He teaches how to evaluate data and prior research, how to follow a trail to elusive treasures, how to organize a project, when to start over, when to ask for help. He shows how an understanding of scholarly values, a commitment to hard work, and the flexibility to change direction combine to enable the researcher to turn a daunting mass of found material into an effective paper or thesis. More than a mere how-to manual, Abbott's guidebook helps teach good habits for acquiring knowledge, the foundation of knowledge worth knowing. Those looking for ten easy steps to a perfect paper may want to look elsewhere. But serious scholars who want their work to stand the test of time will appreciate Abbott's unique, forthright approach and relish every page of *Digital Paper*. *Joint Volumes of Papers Presented to the Legislative Council and Legislative Assembly*.
