Tactics and Emancipation in the Age of Authoritarian Neoliberalism Nicholas Kiersey,William W. Sokoloff,2023-04-11

This book calls for new attention to non traditional forms of emancipatory tactics and welcomes to the fold all manner of everyday expressions of anti authoritarianism Capitalism has taken the mask off Elites feel less obliged to pursue strategies of popular legitimization The traditional institutions of representative democracies are thus hollowing out and stand before us corrupted and broken In this milieu the prospects for a democratic entering of the state are seen as increasingly fantastical and the Left is advised instead to adopt a more tactical posture These expressions can run the gamut from the more obviously theatrical antics of The Yes Men to those of black bloc and other direct action militant groups already well known from their interventions in the cities of Berkeley and Charlottesville This volume addresses this problem via the concept of tactics The point is less to prescribe an ideal range of tactics but rather to consider a broader range of resistances from the struggles of indigenous peoples to those who seek refuge from gender or citizenship based discrimination to those who seek to defend black lives from militarized policing Tactics and Emancipation in the Age of Authoritarian Neoliberalism will be a beneficial read for students and scholars of Critical Political Science International Relations and International Political Economy The chapters in this book were originally published as a special issue of New Political Science *Catalog of the Tamiment Institute Library of New York University: Pamphlet catalogs* Tamiment Library,1980 An American Text-book of Physiology Henry Pickering Bowditch,1903 **An American Text-book of Physiology** William Henry Howell,1903 Bouve collection **An American text-book of physiology v.2, 1901**,1901 **Rethinking Social Studies** E. increasing technology use and advancement are a desired phenomenon creating positive change in human organizations This kind of techno optimism prevails particularly in the discourses of ecological modernization and green growth as well as in the attempts to design sustainable modes of production and consumption within growth driven capitalism This transdisciplinary book investigates the philosophical underpinnings of technology presents a culturally sensitive critique to technology and outlines feasible alternatives for sustainability beyond technology It draws on a variety of scholarly disciplines including the humanities philosophy and environmental history social sciences ecological economics political economy and ecology and natural sciences geology and thermodynamics to contribute to sustainability theory and policy By examining the conflicts and contradictions between technology and sustainability in human organization the book develops a novel way to conceptualize confront and change technology in modern society **"All We are Saying ...
