The Law and Regulation of Airspace Liberalisation in Brazil Delphine Defossez, 2022-05-30 The book starts from the premise that the current aviation framework in Brazil cannot sustain a full liberalisation in the long run While the competition rules in place offer a strong framework which only requires small modifications these rules are not enough to foster a healthy liberalisation In fact until recently Brazilian airlines were operating in a homogenous market where competition was artificial This artificial competition obtained through the imposition of a legal obligation to provide water and a snack and grant a 23kg bag allowance has resulted in a highly concentrated domestic market with very few players Compared to other same size markets such as China or India Brazil is far behind in terms of airlines operating at national level Consequently the opening of the domestic market must be closely regulated to avoid national carriers suffocating under external pressure For this reason state intervention during the liberalisation process is crucial State intervention is also with regard to the protection of passengers The other major problem is the protection framework for passengers which is much too uncertain and burdensome In a sense it is detrimental to the domestic market and passengers Indeed there is no harmonisation of passenger compensation leading to contradictory judgments and possible high moral damages which hinders legal certainty for airlines Compared to the situation in the EU in Brazil airlines have a limited range of defences which are often dismissed by courts This book therefore critically analyses the policies and regulations in place by mainly comparing the Brazilian framework to the European one This choice has been motivated by the fact that European liberalisation is considered the best so far and as Brazil is starting this process much later it could benefit from the European experience This book will be of particular interest to scholars and practitioners interested in the Brazilian system

2003053950 ISBN 1 58477 369 3 Cloth 95 Stimson wrote this study in response to the rapid development of constitution law
that took place around the turn of the century which he attributes to the social impact of modern industrial capitalism He
notes that the enormous volume of cases regarding obligation of contract and commerce among the states indicates a
general shift in the field from cases dealing with the federal constitution or individual state constitutions to cases involving
several constitutions This book was conceived as a guide to this new terrain It continues to be an excellent comparative study
of the federal and state constitutions It is more than a series of comparisons however As its title suggests Stimson includes a
history of the provisions in each constitution and their origins A Valuable piece of work in the field of legal and constitutional
