The Nature of Consciousness Ned Block,Owen Flanagan,Guven Guzeldere,1997-09-10 Intended for anyone attempting
to find their way through the large and confusingly interwoven philosophical literature on consciousness this reader brings
together most of the principal texts in philosophy and a small set of related key works in neuropsychology on consciousness
through 1997 and includes some forthcoming articles Its extensive coverage strikes a balance between seminal works of the
past few decades and the leading edge of philosophical research on consciousness As no other anthology currently does The
Nature of Consciousness provides a substantial introduction to the field and imposes structure on a vast and complicated
literature with sections covering stream of consciousness theoretical issues consciousness and representation the function of
consciousness subjectivity and the explanatory gap the knowledge argument qualia and monitoring conceptions of
consciousness Of the 49 contributions 18 are either new or have been adapted from a previous publication **The Sidereal
