Too Much Magic James Howard Kunstler, 2012-06-19 The author of *The Long Emergency* explains why technology can't solve all our problems and how excessive optimism can endanger our future *The Long Emergency* quickly became a grassroots hit offering a shocking vision of our post oil future and capturing the attention of environmentalists and business leaders alike As discussion about our dependence on fossil fuels and our dysfunctional financial and government institutions continues the author returns with *Too Much Magic* evaluating what has changed and what has not and what direction we need to take in this post financial crisis world Too much magic is what James Howard Kunstler sees in the bright utopian visions of the future dreamed up by optimistic souls who believe technology will solve all our problems Their visions remind him of the flying cars and robot maids that were the dominant images of the future in the 1950s Kunstler's image of the future is much more sober With vision clarity of thought and a pragmatic worldview Kunstler argues that the time for magical thinking and hoping for miracles is over and the time to begin preparing for the long emergency has begun A sharp critic of energy sucking big box landscapes *Winnipeg Free Press*
