cognitive processes It then presents major theoretical contributions of prominent authors to this subject namely Werner s sensoritonic theory Rothschild s model of the biosemiotic structure of the nervous system and Piaget s psychobiological interpretations of intellectual growth This is followed by a general discussion of psychobiological aspects of cognitive development in infancy and a report on physical correlates of school readiness including some investigations on relations between static balance ability and reading skill After a presentation of findings and theoretical considerations related to effects of birth season on physical and mental growth the final chapter summarizes three studies on the impact of physiological pubertal maturation on mental achievements at adolescence
