Moderately Dense Gases describes the Chapman Enskog solution of the transport equation for moderately dense gases
Topics covered range from the propagation of sound in monatomic gases to the kinetic theory of simple and composite
monatomic gases and generalizations of the theory to higher densities The application of kinetic theory to the determination
of intermolecular forces is also discussed This volume is divided into two sections and begins with an introduction to the
work of Hilbert Chapman and Enskog that led to the formulation of the Chapman Enskog theory The Chapman Enskog
results are then compared with those of earlier theories with respect to viscosity heat conduction diffusion and thermal
diffusion Subsequent chapters focus on alternatives to the Chapman Enskog method and some mathematical problems
