**Telecommunications Policy Handbook** Jorge Reina Schement, Félix Gutiérrez, Marvin A. Sirbu, 1982 Overview of the Office of Telecommunications Policy United States. Congress. Senate. Committee on Commerce. Subcommittee on Communications, 1973 **Overview of the Office of Telecommunications Policy, Hearing Before the Subcommittee on Communications ... , 93-1, February 20, 1973** United States. Congress. Senate. Commerce, 1973 Australian Telecommunications Regulation Alasdair Grant, 2004 Australian Telecommunications Regulation provides an accessible but comprehensive review of Australia's telecommunications regulatory framework Written by experienced insiders it describes the laws and policies affecting competitors and consumers and the regulatory and self regulatory bodies that administer them The third edition features a new chapter on interconnection pricing and incorporates all recent legislative reforms and policy initiatives including those affecting the telecommunications competition regime and discusses recent key decisions of the ACCC and other agencies Handbook of Research on Telecommunications Planning and Management for Business , 2009 This book provides original in depth and innovative articles on telecommunications policy management and business applications Provided by publisher **Governing Telecommunications and the New Information Society in Europe** Jacint Jordana, 2002-10-29 offers a fresh look at efforts to manage telecommunications and the emerging information society in Europe \_ Communication Booknotes Quarterly European countries have recently been involved in an extremely broad set of regulator *The Telecom Revolution In India* Varadharajan Sridhar, 2011-11-03 Telecom a phenomenon of the 1990s has been witnessing tremendous growth contributing to more than 2 per cent of India's GDP Once considered a luxury it is now accessible to all sections of society Penetrating to even the remotest corners of the country it is now propelling a revolution Next to China India is today the second largest telecom market in the world This book highlights the unique cost structure tariff regulation and universal service obligations of basic telecom services It dwells upon the different stages of spectrum allocation and management including third generation and broadband wireless services The trade off between competition and industry efficiency due to limited spectrum availability and fragmentation is well emphasized The value chain of the broadcasting sector and unique satellite applications are assessed The book cites success stories of cost effective operator services The reasons for the lagging manufacturing sector in the telecom industry are carefully delineated Finally alliances and partnerships amongst different entities in the sector are analysed Resources in Education , 1988 The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on

interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets
