*Politics of the 'Other' in India and China* Lion Koenig, Bidisha Chaudhuri, 2016-02-22 The social sciences have been heavily influenced by modernization theory focusing on issues of economic growth political development and social change in order to develop a predictive model of linear progress for developing countries following a Western prototype Under this hegemonic paradigm of development the world tends to get divided into simplistic binary oppositions between the West and the rest us and them and self and other Proposing to shift the discussion on what constitutes the Other as opposed to the Self from philosophy and cultural studies to the social sciences this book explores how the structural asymmetries existing between Western discourses and the realities of the non Western world manifest themselves in the ideas institutions and socio political practices of India and China and in how far they shape the social scientist s understanding of their discipline in general It provides a counter narrative by revealing the relativity of geographies and by showing that the conventional presentation of core elements of the Asian socio political set up as aberrations from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements Drawing on multiple disciplines concepts and contexts in India and China the book makes a valuable contribution to the theory and practice of politics as well as to International and Asian Studies

**The Second Vatican Council on Other Religions** Gerald O'Collins, 2013-03-28 Many observers greeted the Second Vatican Council 1962-65 as the most important religious event in the twentieth century Its implementation and impact are still being felt in the Catholic Church the wider Christian world and beyond One sea change that Vatican II brought concerned Roman Catholic attitudes

towards Judaism Islam and other religions Gerald O Collins breaks fresh ground by examining in detail five documents from the Council which embodied a new mindset about other religious faiths and mandated changes that quickly led to international and national dialogues between the Catholic Church and the followers of non Christian religions The book also includes chapters on the insights that prepared the way for the rethinking expressed by Vatican II and on the follow up to the Council s teaching found in the work of Pope John Paul II and Jacques Dupuis O Collins ably illustrates how the Council made a startling advance in official Catholic teaching about followers of other living faiths Carefully researched the book is written in the clear accessible style that readers of previous works by O Collins will recognize
